PROSPECTUS | June 17, 2020

This Prospectus provides important information about the Fund that you should know before investing. Please read it carefully and keep it for future reference.

The Securities and Exchange Commission has not approved or disapproved these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Beginning January 1, 2021, the Fund intends to meet its shareholder report delivery obligations by posting annual and semi-annual shareholder reports to the Fund's website, www.eventidefunds.com rather than delivering paper copies. You will be notified by mail each time a report is posted and provided with the website link to access the report. You may elect to receive paper copies of a specific shareholder report or all future shareholder reports free of charge by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by calling the Fund at 1-877-771-3836. Your election to receive reports in paper will apply to all funds held within the fund complex.

You may elect to receive shareholder reports and other communications from the Fund or your financial intermediary electronically by contacting your financial intermediary or, if you are a direct shareholder, by calling the Fund at 1-877-771-3836. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to do anything.

FUND SUMMARY | Eventide Exponential Technologies Fund

Investment Objective. The Fund seeks to provide long-term capital appreciation.

Fees and Expenses of the Fund. The tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund. More information about these and other discounts is available from your financial professional and is included in the section of the Fund's prospectus entitled **How to Buy Shares** on page 44 and **Appendix A – Intermediary-Specific Sales Charge Reductions and Waivers**, and in the sections of the Fund's Statement of Additional Information entitled **Reduction of Up-Front Sales Charge on Class A Shares** on page 55 and **Waivers of Up-Front Sales Charge on Class A Shares** on page 56.

Shareholder Fees <i>Fees paid directly from your investment</i>	Class A	Class C	Class N	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	5.75%	None	None	None
Maximum Deferred Sales Charge (Load) (as a % of the original purchase price)	1.00%	None	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None	None	None	None
Redemption Fee (as a % of amount redeemed if held less than 180 days)	1.00%	1.00%	1.00%	1.00%
Redemption Fee for Shares Redeemed by Wire Transfer	\$15	\$15	\$15	\$15

Annual Fund Operating Expenses <i>Expenses that you pay each year as a percentage of the value of your investment</i>	Class A	Class C	Class N	Class I
Management Fees	1.10%	1.10%	1.10%	1.10%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.20%	None
Other Expenses ¹	1.40%	1.40%	1.40%	1.40%
Total Annual Fund Operating Expenses	2.75%	3.50%	2.70%	2.50%
Fee Waiver and/or Expense Reimbursement ^{1,2}	<u>(1.07)%</u>	<u>(1.07)%</u>	<u>(1.07)%</u>	<u>(1.07)%</u>
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ¹	1.68%	2.43%	1.63%	1.43%

1. Estimated for the current fiscal year.

2. The Fund's adviser, Eventide Asset Management, LLC ("Eventide" or the "Adviser") has contractually agreed to waive fees and/or reimburse expenses of the Fund to the extent necessary to limit operating expenses (excluding front-end or contingent deferred loads, taxes, leverage interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, dividend expense on securities sold short, underlying fund fees and expenses or extraordinary expenses such as litigation) at 1.68%, 2.43%, 1.63% and 1.43% for Class A shares, Class C shares, Class N shares, and Class I shares, respectively, through October 31, 2021. This agreement may only be terminated by the Board of Trustees on 60 days' written notice to the Adviser and upon the termination of the Management Agreement between Mutual Fund Series Trust (the "Trust") and the Adviser. Fee waivers and expense reimbursements are subject to possible recoupment by the Adviser from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if, after the recoupment is taken into account, such recoupment can be achieved within the lesser of the expense limitation in place at the time of waiver/reimbursement and the expense limitation in place at the time of recapture.

Example of Hypothetical Fund Costs. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example only accounts for the Fund's expense limitation in place through its expiration period, October 31, 2021, and then depicts the Fund's total annual expenses thereafter. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
Class A	\$736	\$1,284
Class C	\$246	\$975
Class N	\$166	\$737
Class I	\$146	\$676

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. Because the Portfolio has not commenced operations as of the date of this prospectus, the portfolio turnover rate for the last fiscal year is not available. In the future, the portfolio turnover rate for the most recent fiscal year will be provided here.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in technology companies. The Fund defines technology companies as those in the information technology, communications, and healthcare technology and devices industries.

The Fund invests primarily in companies that the Adviser believes are participating in and benefitting from technologies, innovations, themes, or trends that have long-term exponential characteristics. The term "exponential" means the potential for accelerated advancements in underlying technologies that can positively impact capabilities and development cycles of a company's products and services. Not every company in the Fund's portfolio will experience exponential growth, and the Fund is not expected to deliver exponential returns.

The Adviser utilizes a fundamental "bottom-up" analysis and quantitative screening to find and evaluate investments for the Fund's portfolio. The Adviser seeks attractively valued securities that, in its opinion, represent above-average long-term investment opportunities or have significant near-term appreciation potential. The Adviser's investment opportunity screening considers strong organic revenue growth, growing market shares, expanding margins and profitability, defensible competitive advantages and disciplined and quality management teams. Valuation is an integral

part of the investment process and purchase decisions are based on the potential reward relative to risk of each security based, in part, on the Adviser's earnings calculations. Securities may be sold when the Adviser believes that they no longer represent relatively attractive investment opportunities or when the Adviser believes the underlying company's practices are no longer consistent with the Adviser's principles.

The Fund gains exposure to technology companies primarily through investing in equity securities including common stock, options, preferred stock and convertible debt. The Fund may invest in private and other companies whose securities may have legal or contractual restrictions on resale or are otherwise illiquid. These companies include development stage companies that have not commenced business operations or have not generated significant revenue. The Fund invests without limitation in securities of companies domiciled outside the United States either directly or through American Depositary Receipts ("ADRs"). The Fund may invest in securities of companies of any market capitalization.

The Adviser uses options strategies to enhance returns, generate income, reduce portfolio volatility, or reduce downside risk when the Adviser believes adverse market, political or other conditions are likely. The Adviser may also utilize a combination of puts and/or calls regarding the same security or puts and calls on related securities.

The Fund is classified as "non-diversified" for purposes of the Investment Company Act of 1940, as amended (the "1940 Act"), which means that it is not limited by the 1940 Act with regard to the portion of its assets that may be invested in the securities of a single issuer. The Fund concentrates investments in the software, technology hardware and equipment, semiconductor, and communications group of industries because, under normal circumstances, it invests over 25% of its net assets in companies in this group of industries.

The Adviser analyzes the performance of potential investments not only for financial strengths and outlook, but also for the company's ability to operate with integrity and create value for customers, employees, and other stakeholders. Eventide uses its values-based screening processes to establish the Fund's eligible investment universe. Securities are generally ineligible for purchase within the Fund unless Eventide's research indicates that the values-based screens are met. Eventide's screening process for potential investments does not apply relative weights between values-based factors and financial factors. While few companies may reach these ideals in every area of their business, these principles articulate the Adviser's highest expectations for corporate behavior. There is no guarantee that the Adviser will be able to successfully screen out all companies that are inconsistent with the following principles. The Adviser seeks to invest in companies that reflect the following values:

- Respecting the value and freedom of all people; this includes the right to life at all stages and freedom from addictive behaviors caused by gambling, pornography, tobacco and alcohol.

- Demonstrating a concern for justice and peace through fair and ethical relationships with customers, suppliers and business partners and through avoidance of products and services that promote weapons production and proliferation.
- Promoting family and community; this includes protecting children from violent forms of entertainment and also includes serving low income communities.
- Exhibiting responsible management practices, including fair-dealing with employees, communities, competitors, suppliers and customers as demonstrated by a company's record regarding litigation, regulatory actions against the company and its record of promoting products and services that improve the lives of people.
- Practicing environmental stewardship; this includes practices considered more sustainable than those of industry peers, reduction in environmental impact when compared to previous periods, and/or the use of more efficient and cleaner energy sources.

Consistent with the Adviser's values, the Fund may invest in securities that fund community development institutions and serve needs such as those of low-to-moderate income families and communities.

Principal Risks of Investing in the Fund

As with any mutual fund, there is no guarantee that the Fund will achieve its objective. Investment markets are unpredictable and there will be certain market conditions where the Fund will not meet its investment objective and will lose money. The Fund's net asset value and returns will vary and you could lose money on your investment in the Fund and those losses could be significant.

The following summarizes the principal risks of investing in the Fund. These risks could adversely affect the net asset value, total return and the value of the Fund and your investment.

ADRs Risk. ADRs, which are typically issued by a bank, are certificates that evidence ownership of shares of a foreign company and are alternatives to purchasing foreign securities directly in their national markets and currencies. ADRs are subject to the same risks as direct investment in foreign companies and involve risks that are not found in investments in U.S. companies.

Development Stage Company Risk. The Fund may invest a portion of the portfolio in development stage companies that are not generating meaningful revenue.

Equity Security Risk. Common and preferred stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Warrants and rights may expire worthless if the price of a common stock is below the conversion price of the warrant or right. Convertible bonds may decline in value if the price of a common stock falls below the conversion price. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction and global or regional political, economic and banking crises.

Ethical Investment Risk. The Fund's ethical values screening criteria could cause it to underperform similar funds that do not have such screening criteria. This could be due to ethically acceptable companies falling out of favor with investors or failing to perform as well as companies that do not meet the Fund's ethical screening guidelines.

Foreign Securities Risk. Since the Fund's investments may include ADRs and foreign securities, the Fund is subject to risks beyond those associated with investing in domestic securities. The value of foreign securities is subject to currency fluctuations. Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. In addition, foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies. The departure of the United Kingdom and the potential departure of additional countries from the European Union may have significant political and financial consequences on global markets. Uncertainty relating to the withdrawal procedures and timeline may have adverse effects on valuations and the renegotiation of current trade agreements, as well as an increase in financial regulation in such markets.

Growth Stock Risk. Not all companies in the Fund's portfolio will experience growth. "Growth" stocks can react differently to issuer, political, market, and economic developments than the market as a whole and other types of stocks. "Growth" stocks also tend to be more expensive relative to their earnings or assets compared to other types of stocks. As a result, "growth" stocks tend to be sensitive to changes in their earnings and more volatile in price than the stock market as a whole. In addition, companies that the Adviser believes have significant growth potential are often companies with new, limited or cyclical product lines, markets or financial resources and the management of such companies may be dependent upon one or a few key people. The stocks of such companies can therefore be subject to more abrupt or erratic market movements than stocks of larger, more established companies or the stock market in general.

Industry Concentration Risk. The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, because the Fund's investments are concentrated in the technology industries.

Investment Style Risk. Different types of investment styles, for example growth or value, tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions. As a result, the Fund's performance may at times be worse than the performance of other mutual funds that invest more broadly or that have different investment styles.

Large-Capitalization Company Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

Limited History of Operations. The Fund has a limited history of operations for investors to evaluate.

Liquidity Risk. Some securities held by the Fund may be difficult to sell, or illiquid, particularly during times of market turmoil. Illiquid securities may also be difficult to value. If the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs, the Fund may be forced to sell at a loss.

Management Risk. The portfolio manager's judgments about the attractiveness, value and potential appreciation of particular securities in which the Fund invests may prove to be incorrect and there is no guarantee that the portfolio manager's judgments will produce the desired results. Exponential in the Fund's name is not intended to suggest exponential returns or any level of returns.

Market Risk. Overall stock or bond market volatility may also affect the value of the Fund. Factors such as domestic and/or foreign economic growth and market conditions, interest rate levels, political events, terrorism, spread of infectious illnesses or other public health issues affect the securities markets. An outbreak of infectious respiratory illness known as COVID-19, which is caused by a novel coronavirus (SARS-CoV-2), was first detected in China in December 2019 and subsequently spread globally. This coronavirus has resulted in, among other things, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, significant disruptions to business operations, market closures, cancellations and restrictions, supply chain disruptions, lower consumer demand, and significant volatility and declines in global financial markets, as well as general concern and uncertainty. The impact of COVID-19 has adversely affected, and other infectious illness outbreaks that may arise in the future could adversely affect, the economies of many nations and the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

Medium (Mid) Capitalization Company Risk. To the extent the Fund invests in the stocks of mid-sized companies, the Fund may be subject to additional risks. The earnings and prospects of these companies are more volatile than larger companies. These companies may experience higher failure rates than larger companies. Mid-sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures. Mid-sized companies may also have limited markets, product lines or financial resources and may lack management experience.

Non-Diversification Risk. Because a relatively high percentage of a non-diversified Fund's assets may be invested in the securities of a limited number of companies that could be in the same or

related economic sectors, the Fund's portfolio may be more susceptible to any single economic, technological or regulatory occurrence than the portfolio of a diversified fund.

Options Risk. As the seller (writer) of a covered call option, the Fund assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise option price because the Fund will no longer hold the underlying security. As the buyer of a put or call option, the Fund risks losing the entire premium invested in the option if the Fund does not exercise the option. As the seller (writer) of a put option, the Fund will lose money if the value of the security falls below the strike price. The use of derivative instruments, such as options, involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments, including the risk that the counterparty to an options transaction may not fulfill its contractual obligations.

Security Risk. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. There can be no guarantee the securities held by the Fund will appreciate in value.

Small-Cap Companies Risk. The Fund may invest a substantial portion of its assets in small-capitalization companies. Although smaller companies may have potential for rapid growth, they are subject to wider price fluctuations due to factors inherent in their size, such as lack of management experience, lack of profitability and financial resources and limited trade volume and frequency. To make a large sale of securities of smaller companies that trade in limited volumes, the Fund may need to sell portfolio holdings at a discount or make a series of small sales over an extended period of time.

Stock Value Risk. Stocks involve the risk that they may never reach what the Adviser believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the Adviser misgauged that worth. They also may decline in price, even though, in theory, they are already undervalued.

Technology Companies Risk. Technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. These companies may have limited product lines, markets, financial resources or personnel. The products of these companies may face obsolescence or adoption challenges due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the technology sector can be heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies. Investments in this sector can be highly volatile. Their values may be adversely affected by such factors as, for example, rapid technological change, changes in management personnel, changes in the competitive environment, and changes in investor sentiment. Many technologies companies are small or mid-sized companies and may be newly organized.

Information Technology Companies Risk. Information technology companies face intense competition, potentially rapid product obsolescence, short product cycles, falling prices and profits, and competition from new market entrants.

Communications Companies Risk. Communications companies are subject to the risk that they will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition.

Healthcare Technology and Devices Companies Risk. Companies in this sector may be heavily dependent on clinical trials with uncertain outcomes and decisions made by the governments and regulatory authorities. Further, these companies are dependent on patent protection, and the expiration of patents may adversely affect the profitability of the companies. Additionally, the profitability of some of these companies may be dependent on a relatively limited number of products, and their products can become obsolete due to sector innovation, changes in technologies or other market developments.

Volatility Risk. The Fund's performance may be volatile, which means that the Fund's performance may be subject to substantial short term changes up or down.

Performance

Because the Fund is a new fund and does not yet have a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of this Prospectus. Updated performance information will be available at no cost by calling 1-877-771-3836 and on the Fund's website at www.eventidefunds.com.

Adviser. Eventide Asset Management, LLC is the Fund's investment adviser.

Portfolio Manager. Anant Goel, Research Analyst of the Adviser, serves as the Fund's portfolio manager. Mr. Goel has served the Fund in this capacity since the Fund commenced operations in June 2020.

Purchase and Sale of Fund Shares. The minimum initial investment in the Class A, Class C, and Class N shares of the Fund is \$1,000 for a regular account and for an IRA account, or \$100 for an automatic investment plan account. The minimum initial investment in Class I shares is \$100,000 for all accounts. The minimum subsequent investment for each class of shares is \$50 for all accounts. You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open. Redemptions requests may be made in writing, by telephone or through a financial intermediary to the Fund or the Fund's transfer agent and will be paid by check or wire transfer.

Tax Information. Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan. If you are investing in a tax-deferred plan, distributions may be taxable upon withdrawal from the plan.

Payments to Broker-Dealers and Other Financial Intermediaries. If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND'S PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Fund	Objective
Exponential Technologies Fund	Long-term capital appreciation.

The investment objective of the Fund is non-fundamental and may be changed by the Board of Trustees (the "Board" or "Trustees") without shareholder approval. If the Board decides to change the Fund's investment objective or the Fund's policy to invest at least 80% of its net assets (plus borrowings for investment purposes) in technology companies, shareholders will be given 60 days' advance notice.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in technology companies. The Fund defines technology companies as those in the information technology, communications and healthcare technology and devices industries.

The Fund invests primarily in companies that the Adviser believes are participating in and benefitting from technologies, innovations, themes, or trends that have long-term exponential characteristics. The term "exponential" means the potential for accelerated advancements in underlying technologies that can positively impact capabilities and development cycles of a company's products and services. Not every company in the Fund's portfolio will experience exponential growth, and the Fund is not expected to deliver exponential returns.

The Adviser utilizes a fundamental "bottom-up" analysis and quantitative screening to find and evaluate investments for inclusion in the Fund's portfolio. The Adviser seeks to invest in attractively valued securities that, in its opinion, represent above-average long-term investment opportunities or have significant near-term appreciation potential. Characteristics the Adviser incorporates in its investment opportunity screening considerations include strong organic revenue growth, growing market shares, expanding margins and profitability, defensible competitive advantages and disciplined and quality management teams. Valuation is an integral part of the investment process and purchase decisions are based on the potential reward relative to risk of each security based, in part, on the Adviser's earnings calculations. Securities may be sold when the Adviser believes that they no longer represent relatively attractive investment opportunities or when the Adviser believes the underlying company's practices are no longer consistent with the Adviser's principles.

The Fund gains exposure to technology companies primarily through investing in equity securities including common stock, options, preferred stock and convertible debt. Companies may include private and other companies whose securities may have legal or contractual restrictions on resale or are otherwise illiquid ("Illiquid Securities"). The Fund will not invest more than 15% of the Fund's net

assets in Illiquid Securities. These companies include development stage companies some of which have not commenced business operations or have not generated significant revenue. The Fund may invest without limitation in securities of companies domiciled outside the United States either directly or through American Depositary Receipts (“ADRs”). The Fund may invest in securities of companies of any market capitalization.

The Adviser uses options strategies, such as calls, covered calls, and puts on individual securities, as well as options on securities indices, to enhance returns, generate income, to reduce portfolio volatility, or to reduce downside risk when the Adviser believes adverse market, political or other conditions are likely. The Adviser may also utilize a combination of puts and/or calls regarding the same security (sometimes referred to as “straddles,” “collars” or “spreads”) or utilize puts and calls on related securities. The Adviser will only make use of these derivative strategies where the derivative’s underlying security is within or related to the sectors in which the Fund normally invests.

The Fund is classified as “non-diversified” for purposes of the Investment Company Act of 1940, as amended (the “1940 Act”), which means that it is not limited by the 1940 Act with regard to the portion of its assets that may be invested in the securities of a single issuer. The Fund concentrates investments in the software, technology hardware and equipment, semiconductor, and communications group of industries because, under normal circumstances, it invests over 25% of its net assets in companies in this group of industries.

The Adviser analyzes the performance of potential investments not only for financial strengths and outlook, but also for the company’s ability to operate with integrity and create value for customers, employees, and other stakeholders. Eventide uses its values-based screening processes to establish the Fund’s eligible investment universe. Securities are generally ineligible for purchase within the Fund unless Eventide’s research indicates that the values-based screens are met. Eventide’s screening process for potential investments does not apply relative weights between values-based factors and financial factors. While few companies may reach these ideals in every area of their business, these principles articulate the Adviser’s highest expectations for corporate behavior. There is no guarantee that the Adviser will be able to successfully screen out all companies that are inconsistent with its principles. The Adviser seeks to invest in companies that reflect the following values:

- Respecting the value and freedom of all people; this includes the right to life at all stages and freedom from addictive behaviors caused by gambling, pornography, tobacco and alcohol.
- Demonstrating a concern for justice and peace through fair and ethical relationships with customers, suppliers and business partners and through avoidance of products and services that promote weapons production and proliferation.
- Promoting family and community; this includes protecting children from violent forms of entertainment and also includes serving low income communities.
- Exhibiting responsible management practices, including fair-dealing with employees, communities, competitors, suppliers and customers as demonstrated by a company’s record regarding litigation, regulatory actions against the company and its record of promoting products and services that improve the lives of people.

- Practicing environmental stewardship; this includes practices considered more sustainable than those of industry peers, reduction in environmental impact when compared to previous periods, and/or the use of more efficient and cleaner energy sources.

Consistent with the Adviser's values, the Fund may invest in securities that fund community development institutions and serve needs such as those of low-to-moderate income families and communities.

Non-Principal Investment Strategy

In addition, the Fund may engage in short selling with up to 10% of its assets.

Manager-of-Managers Order

The Trust and the Adviser have applied for and obtained an exemptive order (the "Order") from the SEC that permits the Adviser, with the Board's approval, to enter into sub-advisory agreements with one or more sub-advisers without obtaining shareholder approval. The Order permits the Adviser, subject to the approval of the Board, to replace sub-advisers or amend sub-advisory agreements, including fees, without shareholder approval whenever the Adviser and the Board believe such action will benefit the Fund and its shareholders.

Temporary Defensive Positions

From time to time, the Fund may take temporary defensive positions, which are inconsistent with the Fund's principal investment strategies, in attempting to respond to adverse market, economic, political, or other conditions. For example, the Fund may hold all or a portion of its assets in money market instruments, including cash, cash equivalents, U.S. government securities, other investment grade fixed income securities, certificates of deposit, bankers acceptances, commercial paper, money market funds and repurchase agreements. The Fund may also use options strategies that the Adviser believes may mitigate the effects of adverse conditions in order to continue to pursue its investment objective. If the Fund invests in a money market fund, the shareholders of the Fund generally will be subject to duplicative management fees. Although the Fund would do this only in seeking to avoid losses, the Fund will not be able to pursue its investment objective during that time, and it could reduce the benefit from any upswing in the market. The Fund may also invest in money market instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Principal and Non-Principal Risks of Investing in the Fund

All mutual funds carry a certain amount of risk. As with any mutual fund, there is no guarantee that the Fund will achieve its objective. Investment markets are unpredictable and there will be certain market conditions where the Fund will not meet its investment objective and will lose money. The Fund's net asset value and returns will vary and you could lose money on your investment in the Fund and those losses could be significant. An investment in the Fund is not a deposit of any bank

and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Also, an investment in the Fund is not a complete investment program.

The risk descriptions below provide a more detailed explanation of the principal investment risks that correspond to the risks described in the Fund Summary section of the Prospectus.

The following summarizes the principal and non-principal risks of the Fund. These risks could adversely affect the net asset value, total return and the value of the Fund and your investment. The principal risks of the Fund are identified by a “✓”.

ADR Currency Risk. To establish a value for the shares, the issuer establishes a “conversion rate” equal to one share of an ADR for a certain number of shares of the stock of a foreign company. This “conversion rate” establishes a universal monetary relationship between the value of the ADR and the local currency of the foreign company stock. Although an ADR is priced in the US dollar, in order to preserve the uniformity of the established “conversion rate,” movements in the exchange rate of the local currency versus the US dollar are automatically reflected in the price of the ADR in US dollars. Therefore, even if the price of the foreign security does not change on its market, if the exchange rate of the local currency relative to the US Dollar declines, the ADR price would decline by a similar measure.

Although an ADR is priced in the US dollar, in order to preserve the uniformity of the established “conversion rate,” movements in the exchange rate of the local currency versus the US dollar are automatically reflected in the price of the ADR in US dollars. Therefore, even if the price of the foreign security does not change on its market, if the exchange rate of the local currency relative to the US Dollar declines, the ADR price would decline by a similar measure.

ADRs Risk. ADRs, which are typically issued by a bank, are certificates that evidence ownership of shares of a foreign company and are alternatives to purchasing foreign securities directly in their national markets and currencies. ADRs are subject to the same risks as direct investment in foreign companies and involve risks that are not found in investments in U.S. companies. In addition to the risks of investing in foreign securities discussed below, there is no guarantee that an ADR issuer will continue to offer a particular ADR. As a result, the Fund may have difficulty selling the ADR, or selling them quickly and efficiently at the prices at which they have been valued. In a sponsored ADR arrangement, the foreign company assumes the obligation to pay some or all of the depositary’s transaction fees. Under an unsponsored ADR arrangement, the foreign company assumes no obligations and the depositary’s transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the foreign company, available information concerning the foreign company may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through. ADRs may not track the price of the underlying foreign securities on which they are based,

and their value may change materially at times when U.S. markets are not open for trading. Certain ADRs are not listed on an exchange and therefore may be considered to be illiquid.

Allocation Risk. If the Fund's strategy for allocating assets among different assets classes does not work as intended, the Fund may not achieve its objective or may underperform other funds with the same or similar investment strategy.

Asset-Backed Security Risk. When the Fund invests in asset-backed securities, including mortgage-backed securities and CMOs, the Fund is subject to the risk that, if the issuer fails to pay interest or repay principal, the assets backing these securities may not be sufficient to support payments on the securities.

Asset-Backed and Mortgage-Backed Security Risk. Prepayment risk is associated with mortgage-backed and asset-backed securities. If interest rates fall, the underlying debt may be repaid ahead of schedule, reducing the value of the Fund's investments. If interest rates rise, there may be fewer prepayments, which would cause the average bond maturity to rise, increasing the potential for the Fund to lose money. The value of these securities may be significantly affected by changes in interest rates, the market's perception of issuers, and the creditworthiness of the parties involved. The ability of the Fund to successfully utilize these instruments may depend on the ability of the Adviser to forecast interest rates and other economic factors correctly. These securities may have a structure that makes their reaction to interest rate changes and other factors difficult to predict, making their value highly volatile. The more senior security classes are generally entitled to receive payment before the subordinate classes if the cash flow generated by the underlying assets is not sufficient to pay all investors. Certain mortgage-backed securities may be secured by pools of mortgages on single-family, multi-family properties, as well as commercial properties. Similarly, asset backed securities may be secured by pools of loans, such as student loans, automobile loans, equipment leases, and credit card receivables. The credit risk on such securities is affected by borrowers or lessees defaulting on their payments. The values of assets underlying mortgage-backed and asset-backed securities may decline and, therefore, may not be adequate to cover underlying investors. Mortgage-backed securities and other securities issued by participants in housing and commercial real estate finance, as well as other real estate-related markets have experienced extraordinary weakness and volatility in certain years. Possible legislation in the area of residential mortgages, credit cards and other loans that may collateralize the securities in which the Fund may invest could negatively impact the value of the Fund's investments. To the extent the Fund focuses its investments in particular types of mortgage-backed or asset-backed securities, the Fund may be more susceptible to risk factors affecting such types of securities. The liquidity of these assets may decrease over time. The market for non-agency MBS may be smaller and less liquid than the market for government MBS.

Bank Loans Risk. The market for bank loans may not be highly liquid and the Fund may have difficulty selling them. These investments expose the Fund to the credit risk of both the financial institution and the underlying borrower. Bank loans settle on a delayed basis, potentially leading to

the sale proceeds of such loans not being available to meet redemptions for a substantial period of time after the sale of the bank loans. Certain bank loans may not be considered “securities,” and purchasers, such as the Fund, therefore may not be entitled to rely on the protections of federal securities laws, including anti-fraud provisions.

Basic Materials Industry Risk. To the extent that the Fund’s investments are exposed to issuers conducting business in basic materials, the Fund is subject to the risk that the securities of such issuers will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting that economic sector. The prices of the securities of basic materials companies also may fluctuate widely in response to such events.

Business Development Companies (“BDC”) Risk. BDCs may carry risks similar to those of a private equity or venture capital fund. BDC company securities are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. A BDC is a form of investment company that is required to invest at least 70% of its total assets in securities (typically debt) of private companies, thinly traded U.S. public companies, or short-term high quality debt securities. The BDCs held by the Fund may leverage their portfolios through borrowings or the issuance of preferred stock. While leverage often serves to increase the yield of a BDC, this leverage also subjects a BDC to increased risks, including the likelihood of increased volatility and the possibility that a BDC’s common share income will fall if the dividend rate of the preferred shares or the interest rate on any borrowings rises. A significant portion of a BDC’s investments are recorded at fair value as determined by its board of directors which may create uncertainty as to the value of the BDC’s investments. Non-traded BDCs are illiquid and it may not be possible to redeem shares or to do so without paying a substantial penalty. Publicly-traded BDCs usually trade at a discount to their net asset value because they invest in unlisted securities and have limited access to capital markets. BDCs are subject to high failure rates among the companies in which they invest and federal securities laws impose restraints upon the organization and operations of BDCs that can limit or negatively impact the performance of a BDC. However, the Fund does not believe it would be liable for the actions of any entity in which it invests and that only its investment is at risk. Also, BDCs may engage in certain principal and joint transactions that a mutual fund or closed-end fund may not without an exemptive order from the SEC.

Call Options Risk. There are risks associated with the sale and purchase of call options. As the seller (writer) of a covered call option, the Fund assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise option price. The Fund continues to bear the risk that it will lose money if the value of the security falls below the strike price. Option premiums are treated as short-term capital gains and when distributed to shareholders, are usually taxable as ordinary income, which may have a higher tax rate than long-term capital gains for shareholders holding Fund shares in a taxable account. As the buyer of a call option, the Fund assumes the risk that the market price of the underlying security will not

increase above the strike price plus the premiums paid, so the Fund bears the risk that it will lose the premium paid for the option.

Capacity Risk. The markets and securities in which the Fund invests may, at times, be limited. Under such conditions, the execution of the Fund's strategy may be affected and the Fund may not achieve its investment objective. In addition, the Fund may not be able to purchase or sell securities at favorable market prices.

Cash or Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.

Cash Strategy Risk. The Fund may, from time to time, invest a substantial portion of its assets in cash or cash equivalents. If the stock market were to appreciate substantially during the time when the Fund is holding a substantial portion of its assets in cash, the Fund may underperform the market.

CDOs and CLOs Risk. CDOs and CLOs are securities backed by an underlying portfolio of debt and loan obligations, respectively. CDOs and CLOs issue classes or "tranches" that vary in risk and yield and may experience substantial losses due to actual defaults, decrease of market value due to collateral defaults and removal of subordinate tranches, market anticipation of defaults and investor aversion to CDO and CLO securities as a class. The risks of investing in CDOs and CLOs depend largely on the tranche invested in and the type of the underlying debts and loans in the tranche of the CDO or CLO, respectively, in which the Fund invests. CDOs and CLOs also carry risks including, but not limited to, interest rate risk and credit risk.

Changing Fixed Income Market Conditions Risk. Following the financial crisis that began in 2007, the Board of Governors of the Federal Reserve System (the "Federal Reserve") has attempted to support the U.S. economic recovery by keeping the federal funds rate at a low level and purchasing large quantities of securities issued or guaranteed by the U.S. government, its agencies or instrumentalities on the open market. Any future interest rate increases could cause the value of any Fund that invests in fixed income securities to decrease. Federal Reserve policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of the Fund's investments and share price to decline. If the Fund invests in derivatives tied to fixed-income markets, the Fund may be more substantially exposed to these risks than the Fund that does not invest in derivatives. To the extent the Fund experiences high redemptions because of these policy changes, the Fund may experience increased portfolio turnover, which will increase the costs the Fund incurs and may lower its performance. Furthermore, if rising interest rates cause the Fund to lose enough value, the Fund could also face increased shareholder redemptions, which could force the Fund to liquidate investments at disadvantageous times or prices, therefore adversely affecting the Fund. In addition, decreases in

fixed income dealer market-making capacity may persist in the future, potentially leading to decreased liquidity and increased volatility in the fixed income markets.

Collateralized Bond Obligation Risk. The pool of securities underlying collateralized bond obligations is typically separated in groupings called tranches representing different degrees of credit quality. The higher quality tranches have greater degrees of protection and pay lower interest rates. The lower tranches, with greater risk, pay higher interest rates.

Commodity Risk. The Fund's exposure to the commodities futures markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments, commodity-based notes may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments.

Conflict of Interest - Adviser Risk. The Adviser, portfolio managers and other individuals associated with the Adviser may have compensation and/or other arrangements that may be in conflict to the interests of the Fund.

Conflict of Interest - Portfolio Manager Risk. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other accounts. More specifically, portfolio managers who manage multiple funds are presented with the following potential conflicts:

The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. The management of multiple funds and accounts also may give rise to potential conflicts of interest if the funds and accounts have different objectives, benchmarks, time horizons, and fees as the portfolio manager must allocate his time and investment ideas across multiple funds and accounts.

With respect to securities transactions for the Fund, the Adviser determines which broker to use to execute each order, consistent with the duty to seek best execution of the transaction. The portfolio manager may execute transactions for another fund or account that may adversely impact the value of securities held by the Fund. Securities selected for funds or accounts other than the Funds may outperform the securities selected for the Fund.

The appearance of a conflict of interest may arise where the Adviser has an incentive, such as a performance-based management fee. The management of personal accounts may give rise to potential conflicts of interest; there is no assurance that the Fund's code of ethics will adequately address such conflicts. One of the portfolio manager's numerous responsibilities is to assist in the sale of Fund shares. Because the portfolio manager's compensation is indirectly linked to the sale of

Fund shares, they may have an incentive to devote time to marketing efforts designed to increase sales of Fund shares.

The Adviser has adopted a code of ethics that, among other things, permits personal trading by employees under conditions where it has been determined that such trades would not adversely impact client accounts. Nevertheless, the management of personal accounts may give rise to potential conflicts of interest, and there is no assurance that these codes of ethics will adequately address such conflicts.

Please refer to the section of the Fund's SAI entitled "Potential Conflicts of Interest" for additional information regarding potential conflicts of interest.

Consumer Discretionary Risk. The success of consumer product manufacturers and retailers is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability

Convertible Securities Risk. Convertible securities are hybrid securities that have characteristics of both bonds and common stocks and are subject to fixed income security risks and conversion value-related equity risk. Convertible securities are similar to other fixed-income securities because they usually pay a fixed interest rate and are obligated to repay principal on a given date in the future. The market value of fixed-income securities tends to decline as interest rates increase. Convertible securities are particularly sensitive to changes in interest rates when their conversion to equity feature is small relative to the interest and principal value of the bond. Convertible issuers may not be able to make principal and interest payments on the bond as they become due. Convertible securities may also be subject to prepayment or redemption risk. If a convertible security is called for redemption, the Fund will be required to surrender the security for redemption, convert it into the issuing company's common stock or cash at a time that may be unfavorable to the Fund. Convertible securities have characteristics similar to common stocks especially when their conversion value is greater than the interest and principal value of the bond. When a convertible security's value is more closely tied to its conversion to stock feature, it is sensitive to the underlying stock's price.

The value of certain convertible securities, such as preferred stocks, will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of preferred stock. Preferred stocks are also subject to credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments. Preferred stock prices tend to move more slowly upwards than common stock prices. In an issuer bankruptcy, preferred stock holders are subordinate to the claims of debtholders and may receive little or no recovery.

Synthetic convertible securities are derivative debt securities and are subject to the creditworthiness of the counterparty of the synthetic security. The value of a synthetic convertible security may decline substantially if the counterparty's creditworthiness deteriorates. The value of a synthetic convertible security may also respond differently to market fluctuations than a convertible bond because a synthetic convertible is composed of two or more separate securities, each with its own market value.

Counterparty Risk. The Fund may engage in transactions in securities and financial instruments that involve counterparties. Counterparty risk is the risk that a counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest or settlement payments, or otherwise honor its obligations.

Credit Default Swap Risk. Credit default swaps ("CDS") are typically two-party financial contracts that transfer credit exposure between the two parties. Under a typical CDS, one party (the "seller") receives pre-determined periodic payments from the other party (the "buyer"). The seller agrees to make compensating specific payments to the buyer if a negative credit event occurs, such as the bankruptcy or default by the issuer of the underlying debt instrument. The use of CDS involves investment techniques and risks different from those associated with ordinary portfolio security transactions, such as potentially heightened counterparty, concentration and exposure risks.

Credit Risk. Credit risk is the risk that an issuer of a security will fail to pay principal and interest in a timely manner, reducing the Fund's total return. The Fund may invest in high-yield, high-risk securities commonly called "junk bonds", that are not investment grade and are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. Credit risk may be substantial for the Fund.

Credit Risk (for Floating Rate Loans). Credit risk is the risk that the issuer of a security and other instrument will not be able to make principal and interest payments when due. The value of the Fund's shares, and the Fund's ability to pay dividends, is dependent upon the performance of the assets in its portfolio. Prices of the Fund's investments can fall if the actual or perceived financial health of the borrowers on, or issuers of, such investments deteriorates, whether because of broad economic or issuer-specific reasons. In severe cases, the borrower or issuer could be late in paying interest or principal, or could fail to pay altogether.

In the event a borrower fails to pay scheduled interest or principal payments on an investment held by the Fund, the Fund will experience a reduction in its income and a decline in the market value of such investment. This will likely reduce the amount of dividends paid by the Fund and likely lead to a decline in the net asset value of the Fund's shares.

The Fund may invest in floating rate loans that are senior in the capital structure of the borrower or issuer, and that are secured with specific collateral. Loans that are senior and secured generally involve less risk than unsecured or subordinated debt and equity instruments of the same borrower because the payment of principal and interest on senior loans is an obligation of the borrower that, in most instances, takes precedence over the payment of dividends or the return of capital to the borrower's shareholders, and payments to bond holders; and because of the collateral supporting the repayment of the debt instrument. However, the value of the collateral may not equal the Fund's investment when the debt instrument is acquired or may decline below the principal amount of the debt instrument subsequent to the Fund's investment. Also, to the extent that collateral consists of stocks of the borrower, or its subsidiaries or affiliates, the Fund bears the risk that the stocks may decline in value, be relatively illiquid, or may lose all or substantially all of their value, causing the Fund's investment to be undercollateralized. Therefore, the liquidation of the collateral underlying a floating rate loan in which the Fund has invested, may not satisfy the borrower's obligation to the Fund in the event of non-payment of scheduled interest or principal, and the collateral may not be able to be readily liquidated.

In the event of the bankruptcy of a borrower or issuer, the Fund could experience delays and limitations on its ability to realize the benefits of the collateral securing the Fund's investment. Among the risks involved in a bankruptcy are assertions that the pledge of collateral to secure a loan constitutes a fraudulent conveyance or preferential transfer that would have the effect of nullifying or subordinating the Fund's rights to the collateral.

The floating rate debt in which the Fund invests may be generally rated lower than investment-grade credit quality, i.e., rated lower than "Baa3" by Moody's Investors Service, Inc. ("Moody's") or "BBB-" by Standard & Poor's Ratings Services ("S&P"), or have been made to borrowers who have issued debt securities that are rated lower than investment-grade in quality or, if unrated, would be rated lower than investment-grade credit quality. Investment decisions for the Fund will be based largely on the credit analysis performed by the Adviser, and not entirely on rating agency evaluation. This analysis may be difficult to perform. Information about a loan and its borrower generally is not in the public domain. Many borrowers have not issued securities to the public and are not subject to reporting requirements under federal securities laws. Generally, however, borrowers are required to provide financial information to lenders and information may be available from other loan market participants or agents that originate or administer loans.

Currency Risk: Currency trading involves significant risks, including market risk, interest rate risk, country risk, counterparty credit risk and short sale risk. Market risk results from the price movement of foreign currency values in response to shifting market supply and demand. Since exchange rate changes can readily move in one direction, a currency position carried overnight or over a number of days may involve greater risk than one carried a few minutes or hours. Interest rate risk arises whenever a country changes its stated interest rate target associated with its currency. Country risk arises because virtually every country has interfered with international transactions in its currency. Interference has taken the form of regulation of the local exchange market, restrictions on foreign

investment by residents or limits on inflows of investment funds from abroad. Restrictions on the exchange market or on international transactions are intended to affect the level or movement of the exchange rate. This risk could include the country issuing a new currency, effectively making the “old” currency worthless. The Fund may also take short positions, through derivatives, if the Adviser believes the value of a currency is likely to depreciate in value. A “short” position is, in effect, similar to a sale in which the Fund sells a currency it does not own but, has borrowed in anticipation that the market price of the currency will decline. The Fund must replace a short currency position by purchasing it at the market price at the time of replacement, which may be more or less than the price at which the Fund took a short position in the currency.

Derivatives Risk. The Fund may use derivatives to enhance returns or hedge against market declines. The Fund’s use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities including:

Leverage and Volatility Risk. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, including futures contracts, permit a high degree of leverage. In addition, it is anticipated that the Underlying Pools will be “notionally funded” - that is their nominal trading level will exceed the cash deposited in the trading accounts. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. The use of leveraged derivatives can magnify the Fund’s potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund’s share price.

Liquidity Risk. Although it is anticipated that the derivatives traded by the Fund will be actively traded, it is possible that particular investments might be difficult to purchase or sell, possibly preventing the Fund from executing positions at an advantageous time or price, or possibly requiring them to dispose of other investments at unfavorable times or prices in order to satisfy their obligations. Most U.S. commodity futures exchanges impose daily limits regulating the maximum amount above or below the previous day’s settlement price which a futures contract price may fluctuate during a single day. During a single trading day no trades may be executed at prices beyond the daily limit. Once the price of a particular futures contract has increased or decreased to the limit point, it may be difficult, costly or impossible to liquidate a position. It is also possible that an exchange or the Commodity Futures Trading Commission (“CFTC”), which regulates commodity futures exchanges, may suspend trading in a

particular contract, order immediate settlement of a contract or order that trading to the liquidation of open positions only.

Counterparty Risk. The Fund may engage in transactions in securities and financial instruments that involve counterparties. Counterparty risk is the risk that a counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest or settlement payments, or otherwise honor its obligations.

Development Stage Company Risk. The Fund may invest a substantial portion of the portfolio in development stage companies that are not generating meaningful revenue. The prospects of development stage companies in the healthcare and life sciences sectors may depend entirely on the outcomes of research and development, clinical trials and uncertain regulatory outcomes for a small number of products. If these fail, these companies may decline in value substantially.

Distribution Policy Risk. The Fund distribution policy is not designed to generate, and is not expected to result in, distributions that equal a fixed percentage of the Fund's current net asset value per share. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Return of capital is the portion of distribution that is a return of your original investment dollars in the Fund. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares. The Fund will provide disclosures, with each distribution, that estimate the percentages of the current and year-to-date distributions that represent (1) net investment income, (2) capital gains and (3) return of capital. At the end of the year, the Fund may be required under applicable law to re-characterize distributions made previously during that year among (1) ordinary income, (2) capital gains and (3) return of capital for tax purposes.

Dividend Yield Risk. While the Fund may hold securities of companies that have historically paid a dividend, those companies may reduce or discontinue their dividends, thus reducing the yield of the Fund. Lower priced securities in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield securities, in certain market conditions, may be worse than the market return of other investment strategies or the overall stock market.

Duration Risk. Longer-term securities may be more sensitive to interest rate changes. Given the recent, historically low interest rates and the potential for increases in those rates, a heightened risk is posed by rising interest rates to the Fund whose portfolios include longer-term fixed income securities. Effective duration estimates price changes for relatively small changes in rates. If rates rise significantly, effective duration may tend to understate the drop in a security's price. If rates drop significantly, effective duration may tend to overstate the rise in a security's price.

Emerging Markets Risk. Investing in emerging markets involves not only the risks described below with respect to investing in foreign securities, but also other risks, including exposure to economic structures that are generally less diverse and mature, and to political systems that can be expected to have less stability, than those of developed countries. For example, emerging markets may experience significant declines in value due to political and currency volatility. Other characteristics of emerging markets that may affect investment include certain national policies that may restrict investment by foreigners in issuers or industries deemed sensitive to relevant national interests and the absence of developed structures governing private and foreign investments and private property. The typically small size of the markets of securities of issuers located in emerging markets and the possibility of a low or nonexistent volume of trading in those securities may also result in a lack of liquidity and in price volatility of those securities.

Equity Security Risk. Common and preferred stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Warrants and rights may expire worthless if the price of a common stock is below the conversion price of the warrant or right. Convertible bonds may decline in value if the price of a common stock falls below the conversion price. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction and global or regional political, economic and banking crises.

ETFs Risk. Like an open-end investment company (mutual fund), the value of an ETF can fluctuate based on the prices of the securities owned by the ETF, and ETFs are also subject to the following additional risks: (i) the ETF's market price may be less than its net asset value; (ii) an active market for the ETF may not develop; and (iii) market trading in the ETF may be halted under certain circumstances.

Ethical Investment Risk. The Fund's ethical values screening criteria could cause it to underperform similar funds that do not have such screening criteria. This could be due to ethically acceptable companies falling out of favor with investors or failing to perform as well as companies that do not meet the Fund's ethical screening guidelines. The Fund's ethical screening criteria limits the potential universe of investments and could cause it to avoid investments that subsequently perform well.

Exchange Traded Notes Risk. Similar to ETFs, owning an ETN generally reflects the risks of owning the assets that comprise the underlying market benchmark or strategy that the ETN is designed to reflect. ETNs also are subject to issuer and fixed-income risk.

Extension Risk. If interest rates rise, repayments of principal on certain debt securities, including, but not limited to, floating rate loans and mortgage-related securities, may occur at a slower rate than expected and the expected maturity of those securities could lengthen as a result. Securities

that are subject to extension risk generally have a greater potential for loss when prevailing interest rates rise, which could cause their values to fall sharply.

Fixed Income Risk. When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

Foreign Currency Risk. Currency trading involves significant risks, including market risk, interest rate risk, country risk, counterparty credit risk and short sale risk. Market risk results from the price movement of foreign currency values in response to shifting market supply and demand. Since exchange rate changes can readily move in one direction, a currency position carried overnight or over a number of days may involve greater risk than one carried a few minutes or hours. Interest rate risk arises whenever a country changes its stated interest rate target associated with its currency. Country risk arises because virtually every country has interfered with international transactions in its currency. Interference has taken the form of regulation of the local exchange market, restrictions on foreign investment by residents or limits on inflows of investment funds from abroad. Restrictions on the exchange market or on international transactions are intended to affect the level or movement of the exchange rate. This risk could include the country issuing a new currency, effectively making the "old" currency worthless.

Foreign Exchanges Risk. A portion of the derivatives trades made by the Fund may be take place on foreign markets. Neither existing CFTC regulations nor regulations of any other U.S. governmental agency apply to transactions on foreign markets. Some of these foreign markets, in contrast to U.S. exchanges, are so-called principals' markets in which performance is the responsibility only of the individual counterparty with whom the trader has entered into a commodity interest transaction and not of the exchange or clearing corporation. In these kinds of markets, there is risk of bankruptcy or other failure or refusal to perform by the counterparty.

Foreign Investment Risk. Foreign investing involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards. Investing in emerging markets imposes risks different from, or greater than, risks of investing in foreign developed countries.

Foreign Securities Risk. Since the Fund's investments may include ADRs and foreign securities, the Fund is subject to risks beyond those associated with investing in domestic securities. The value of foreign securities is subject to currency fluctuations. Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. In addition, foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies. Depository receipts maintain substantially the same risks as those associated with investments in foreign securities and may be under no obligation to distribute shareholder communications or pass through any voting rights with respect to the deposited securities. The departure of the United Kingdom and the potential departure of additional countries from the European Union may have significant political and financial consequences on global markets. Uncertainty relating to the withdrawal procedures and timeline may have adverse effects on valuations and the renegotiation of current trade agreements, as well as an increase in financial regulation in such markets.

Forwards Risk. Foreign currency forward contracts are a type of derivative contract whereby the Fund may agree to buy or sell a country's or region's currency at a specific price on a specific date, usually 30, 60, or 90 days in the future. These contracts are subject to the risk of political and economic factors applicable to the countries issuing the underlying currencies and may fall in value due to foreign market downswings or foreign currency value fluctuations. Forward foreign currency contracts are individually negotiated and privately traded so they are dependent upon the creditworthiness of the counterparty and subject to counterparty risk. The Fund's investment or hedging strategies may not achieve their objective. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Derivative contracts ordinarily have leverage inherent in their terms and low margin deposits normally required in trading derivatives permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. The use of leveraged derivatives can magnify the Fund's potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's share price.

Futures Contract Risk. The Fund's use of futures contracts involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures contracts involve leverage, which means a small percentage of assets invested in futures contracts can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectation

and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures contracts do not pay dividends unlike the stocks upon which they are based.

Futures Risk. The Fund's use of stock index futures as a substitute for stocks or to enhance returns involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

Geographic Concentration Risk. The Fund may be particularly susceptible to economic, political, regulatory or other events or conditions affecting countries within the specific geographic regions in which the Fund invests. Currency devaluations could occur in countries that have not yet experienced currency devaluation to date, or could continue to occur in countries that have already experienced such devaluations. As a result, the Fund's net asset value may be more volatile than a more geographically diversified fund.

Growth Stock Risk. "Growth" stocks can react differently to issuer, political, market, and economic developments than the market as a whole and other types of stocks. "Growth" stocks also tend to be more expensive relative to their earnings or assets compared to other types of stocks. As a result, "growth" stocks tend to be sensitive to changes in their earnings and more volatile in price than the stock market as a whole. In addition, companies that the Adviser believes have significant growth potential are often companies with new, limited or cyclical product lines, markets or financial resources and the management of such companies may be dependent upon one or a few key people. The stocks of such companies can therefore be subject to more abrupt or erratic market movements than stocks of larger, more established companies or the stock market in general.

Hedging Risk. Hedging is a strategy in which the Fund uses a derivative to offset the risks associated with other Fund holdings. There can be no assurance that the Fund's hedging strategy will reduce risk or that hedging transactions will be either available or cost effective. The Fund is not required to use hedging and may choose not to do so.

High Yield Risk. Lower-quality fixed income securities, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic

downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund's share price.

Income Risk. Income risk is the risk that the income from the Fund's portfolio will decline because of falling market interest rates. This can result when the Fund invests the proceeds from new share sales, or from matured or called bonds, at market interest rates that are below the portfolio's current earnings rate.

Index Risk. If the derivative is linked to the performance of an index, it will be subject to the risks associated with changes in that index.

Industrial Sector Risk. Industrial companies are affected by supply and demand both for their specific product or service and for industrial sector products in general. Government regulation, world events, exchange rates and economic conditions, technological developments and liabilities for environmental damage and general civil liabilities will likewise affect the performance of these companies.

Industry Concentration Risk. The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, because the Fund's investments are concentrated in the technology industries.

Inflation-Indexed Bond Risk. Inflation-indexed bonds are fixed income securities whose principal values are periodically adjusted according to a measure of inflation. If the index measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal. With regard to municipal inflation-indexed bonds and certain corporate inflation-indexed bonds, the inflation adjustment is reflected in the semi-annual coupon payment. As a result, the principal value of municipal inflation-indexed bonds and such corporate inflation indexed bonds does not adjust according to the rate of inflation. The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates are tied to the relationship between nominal interest rates and the rate of inflation. If nominal interest rates increase at a faster rate than inflation, real interest rates may rise, leading to a decrease in value of inflation-indexed bonds. Inflation-indexed bonds may cause a potential cash flow mismatch to investors, because an increase in the principal amount of an inflation-indexed bond will be treated as interest income currently subject to tax at ordinary income rates even though investors will not receive repayment of principal until maturity. If the Fund invests in such bonds, it will be required to distribute such interest income in order to qualify for treatment as a regulated investment company and eliminate

the Fund-level tax, without a corresponding receipt of cash, and therefore may be required to dispose of portfolio securities at a time when it may not be desirable.

Inflation Protected Securities Risk. Inflation-protected debt securities tend to react to changes in real interest rates. Real interest rates represent nominal (stated) interest rates reduced by the expected impact of inflation. In general, the price of an inflation-protected debt security can fall when real interest rates rise, and can rise when real interest rates fall. Interest payments on inflation-protected debt securities can be unpredictable and will vary as the principal and/or interest is adjusted for inflation.

Interest Rate Risk. Interest rate risk is the risk that bond prices overall, including the prices of securities held by the Fund, will decline over short or even long periods of time due to rising interest rates. Bonds with longer maturities tend to be more sensitive to interest rates than bonds with shorter maturities. For example, if interest rates go up by 1.0%, the price of a 4% coupon bond will decrease by approximately 1.0% for a bond with 1 year to maturity and approximately 4.4% for a bond with 5 years to maturity.

Interest Rate Risk (for Floating Rate Loans). Changes in short-term market interest rates will directly affect the yield on the shares of the Fund whose investments are normally invested in floating rate debt. If short-term market interest rates fall, the yield on the Fund's shares will also fall. Conversely, when short-term market interest rates rise, because of the lag between changes in such short-term rates and the resetting of the floating rates on the floating rate debt in the Fund's portfolio, the impact of rising rates will be delayed to the extent of such lag. The impact of market interest rate changes on the Fund's yield will also be affected by whether, and the extent to which, the floating rate debt in the Fund's portfolio is subject to floors on the LIBOR base rate on which interest is calculated for such loans (a "LIBOR floor"). So long as the base rate for a loan remains under the LIBOR floor, changes in short-term interest rates will not affect the yield on such loans. In addition, to the extent that the interest rate spreads on floating rate debt in the Fund's portfolio experience a general decline, the yield on the Fund's shares will fall and the value of the Fund's assets may decrease, which will cause the Fund's net asset value to decrease. With respect to the Fund's investments in fixed rate instruments, a rise in interest rates generally causes values to fall. The values of fixed rate securities with longer maturities or duration are more sensitive to changes in interest rates.

Inverse ETF Risk. Investing in inverse ETFs may result in increased volatility due to the funds' possible use of short sales of securities and derivatives such as options and futures. The use of leverage by an ETF increases risk to the Fund. The more the Fund invests in leveraged instruments, the more the leverage will magnify any gains or losses on those investments. During periods of increased volatility, inverse ETFs may not perform in the manner they are designed.

Investment Model Risk. Like all quantitative analysis, the Adviser's investment model carries a risk that the mathematical model used might be based on one or more incorrect assumptions. Rapidly changing and unforeseen market dynamics could also lead to a decrease in short term effectiveness

of the mathematical model. No assurance can be given that the fund will be successful under all or any market conditions.

Investment Style Risk. Different types of investment styles, for example growth or value, tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions. As a result, the Fund's performance may at times be worse than the performance of other mutual funds that invest more broadly or that have different investment styles.

Issuer Specific Risk. The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments. The value of each underlying pool will be dependent on the success of the strategies used by its manager or managers. Certain managers may be dependent upon a single individual or small group of individuals, the loss of which could adversely affect their success.

Junk Bond Risk. Lower-quality bonds, known as "high yield" or "junk" bonds, present a significant risk for loss of principal and interest. These bonds offer the potential for higher return, but also involve greater risk than bonds of higher quality, including an increased possibility that the bond's issuer, obligor or guarantor may not be able to make its payments of interest and principal (credit quality risk). If that happens, the value of the bond may decrease, and the Fund's share price may decrease and its income distribution may be reduced. An economic downturn or period of rising interest rates (interest rate risk) could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds (liquidity risk). Such securities may also include "Rule 144A" securities, which are subject to resale restrictions. The lack of a liquid market for these bonds could decrease the Fund's share price.

Large-Capitalization Company Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

Leverage Risk. Using derivatives can create leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of mutual funds that do not use such techniques.

Leveraged ETF Risk. Leveraged ETFs will amplify losses because they are designed to produce returns that are a multiple of the index to which they are linked. Most leveraged ETFs "reset" daily.

Due to the effect of compounding, their performance over longer periods of time can differ significantly from the performance of their underlying index or benchmark during the same period of time.

Limited History of Operations. The Fund is a relatively new mutual fund and has a limited history of operations for investors to evaluate.

Liquidity Risk. Liquidity risk exists when particular investments are difficult to sell. Although most of the Fund's securities must be liquid at the time of investment, the Fund may purchase illiquid securities and securities may become illiquid after purchase by the Fund, particularly during periods of market turmoil. When the Fund holds illiquid investments, the Fund's investments may be harder to value, especially in changing markets, and if the Fund is forced to sell these investments to meet redemptions or for other cash needs, the Fund may suffer a loss. In addition, when there is illiquidity in the market for certain securities, the Fund, due to limitations on investments in illiquid securities, may be unable to achieve its desired level of exposure to a certain sector.

Litigation Risk. The Fund may be named in a lawsuit despite no wrongdoing by the Fund, its Adviser or any other service provider to the Fund. The defense of a lawsuit may detrimentally impact the Fund and its shareholders, including incurring legal defense cost, regulatory costs and increased insurance premiums.

Loan Risk. Investments in bank loans may subject the Fund to heightened credit risks because such loans tend to be highly leveraged and potentially more susceptible to the risks of interest deferral, default and/or bankruptcy. Senior floating rate loans are often rated below investment grade, but may also be unrated. The risks associated with these loans can be similar to the risks of below investment grade fixed income instruments. An economic downturn would generally lead to a higher non-payment rate, and a senior floating rate loan may lose significant market value before a default occurs. Moreover, any specific collateral used to secure a senior floating rate loan may decline in value or become illiquid, which would adversely affect the loan's value. Unlike the securities markets, there is no central clearinghouse for loan trades, and the loan market has not established enforceable settlement standards or remedies for failure to settle. Therefore, portfolio transactions in loans may have uncertain settlement time periods. Senior floating rate loans are subject to a number of risks described elsewhere in this Prospectus, including liquidity risk and the risk of investing in below-investment grade fixed income instruments.

Lower Quality Debt. Lower-quality debt securities involve greater risk of default or price changes due to changes in the credit quality of the issuer. The value of lower-quality debt securities often fluctuates in response to company, political, or economic developments and can decline significantly over short periods of time or during periods of general or regional economic difficulty. Lower-quality debt securities can be thinly traded or have restrictions on resale, making them difficult to sell at an acceptable price. The default rate for lower-quality debt securities is likely to be higher during economic recessions or periods of high interest rates.

Machinery and Electrical Equipment Industry Risk. The machinery and electrical equipment industries can be significantly affected by general economic trends, including employment, economic growth, and interest rates; changes in consumer sentiment and spending; overall capital spending levels, which are influenced by an individual company's profitability and broader factors such as interest rates and foreign competition; commodity prices; technical obsolescence; labor relations legislation; government regulation and spending; import controls; and worldwide competition. Companies in these industries also can be adversely affected by liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control.

Management Risk. The net asset value of the Fund changes daily based on the performance of the securities in which it invests. The portfolio managers' judgments about the attractiveness, value and potential appreciation of particular securities in which the Fund invests may prove to be incorrect and there is no guarantee that the portfolio managers' judgments will produce the desired results. Exponential in the Fund's name is not intended to suggest exponential returns or any level of returns.

Market Risk. Overall stock or bond market volatility may also affect the value of the Fund. Factors such as domestic and/or foreign economic growth and market conditions, interest rate levels, political events and terrorism affect the securities markets. The Fund's investments may decline in value if markets perform poorly. There is also a risk that the Fund's investments will underperform either the securities markets generally or particular segments of the securities markets. Unexpected local, regional or global events, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; the spread of infectious illnesses or other public health issues; recessions and depressions; or other events could have a significant impact on the Fund, and may impair market liquidity, thereby increasing liquidity risk. Such events can cause investor fear, which can adversely affect the economies of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen.

An outbreak of infectious respiratory illness known as COVID-19, which is caused by a novel coronavirus (SARS-CoV-2), was first detected in China in December 2019 and subsequently spread globally. This coronavirus has resulted in, among other things, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, significant disruptions to business operations, market closures, cancellations and restrictions, supply chain disruptions, lower consumer demand, and significant volatility and declines in global financial markets, as well as general concern and uncertainty. The impact of COVID-19 has adversely affected, and other infectious illness outbreaks that may arise in the future could adversely affect, the economies of many nations and the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic

risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

Market Volatility-Linked ETFs Risk. ETFs that are linked to market volatility have the risks associated with investing in futures. An ETF's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the ETF to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

MBS and CMO Risk. MBS and CMOs are subject to credit risk because underlying loan borrowers may default. MBS and CMO default rates tend to be sensitive to overall economic conditions and to localized property vacancy rates and prices. Borrower default rates may be significantly higher than estimated. Certain individual securities may be more sensitive to default rates because payments may be subordinated to other securities of the same issuer. The Adviser's assessment, or a rating agency's assessment, of borrower credit quality, default rates and loss rates may prove to be overly optimistic. Additionally, MBS and CMOs are subject to prepayment risk because the underlying loans held by the issuers may be paid off prior to maturity at faster or lower rates than expected. The value of these securities may go down as a result of changes in prepayment rates on the underlying mortgages or loans. During periods of declining interest rates, prepayment rates usually increases and the Fund may have to reinvest prepayment proceeds at a lower interest rate. CMOs may be less susceptible to this risk because payment priorities within the CMO may have the effect of a prepayment lock out period.

Medium (Mid) Capitalization Stock Risk. To the extent the Fund invests in the stocks of mid-sized companies, the Fund may be subject to additional risks. The earnings and prospects of these companies are more volatile than larger companies. These companies may experience higher failure rates than larger companies. Mid-sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures. Mid-sized companies may also have limited markets, product lines or financial resources and may lack management experience.

Micro Capitalization Risk. Micro capitalization companies may be newly formed or have limited product lines, distribution channels and financial and managerial resources. The risks associated with those investments are generally greater than those associated with investments in the securities of larger, more established companies. This may cause the Fund's net asset value to be more volatile when compared to investment companies that focus only on large-capitalization companies.

Generally, securities of micro capitalization companies are more likely to experience sharper swings in market value, less liquid markets in which it may be more difficult for the Adviser to sell at times and at prices that the Adviser believes appropriate and generally are more volatile than those of larger companies. Compared to large companies, micro capitalization companies are more likely to have (i) less information publicly available, (ii) more limited product lines or markets and less mature businesses, (iii) fewer capital resources, (iv) more limited management depth and (v) shorter operating histories. Further, the equity securities of micro capitalization companies are often traded over the counter and generally experience a lower trading volume than is typical for securities that are traded on a national securities exchange. Consequently, the Fund may be required to dispose of these securities over a larger period of time (and potentially at less favorable prices) than would be the case for securities of larger companies, offering greater potential for gains and losses and associated tax consequences.

MLP and MLP-Related Securities. Investments in MLPs and MLP-related securities involve risks different from those of investing in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP or MLP-related security, risks related to potential conflicts of interest between an MLP and the MLP's general partner, cash flow risks, dilution risks (which could occur if the MLP raises capital and then invests it in projects whose return fails to exceed the cost of capital raised) and risks related to the general partner's limited call right. MLPs and MLP-related securities are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns. Depending on the state of interest rates in general, the use of MLPs or MLP-related securities could enhance or harm the overall performance of the Fund.

MLP Tax Risk. MLPs, typically, do not pay U.S. federal income tax at the partnership level. Instead, each partner is allocated a share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law or in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income. The classification of an MLP as a corporation for U.S. federal income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP. Thus, if any of the MLPs owned by the Fund were treated as corporations for U.S. federal income tax purposes, it could result in a reduction of the value of your investment in the Fund and lower income, as compared to an MLP that is not taxed as a corporation.

Mortgage-Backed Securities Risk. Mortgage-backed securities represent participating interests in pools of residential mortgage loans, some of which are guaranteed by the U.S. Government, its agencies or instrumentalities. However, the guarantee of these types of securities relates to the principal and interest payments and not the market value of such securities. In addition, the guarantee only relates to the mortgage-backed securities held by the Fund and not the purchase of shares of the Fund.

Mortgage-backed securities do not have a fixed maturity and their expected maturities may vary when interest rates rise or fall. An increased rate of prepayments on the Fund's mortgage-backed securities will result in an unforeseen loss of interest income to the Fund as the Fund may be required to reinvest assets at a lower interest rate. A decreased rate of prepayments lengthens the expected maturity of a mortgage-backed security. The prices of mortgage-backed securities may decrease more than prices of other fixed-income securities when interest rates rise.

Municipal Bond Risk. The value of municipal bonds that depend on a specific revenue source or general revenue source to fund their payment obligations may fluctuate as a result of changes in the cash flows generated by the revenue source(s) or changes in the priority of the municipal obligation to receive the cash flows generated by the revenue source(s). In addition, changes in federal tax laws or the activity of an issuer may adversely affect the tax-exempt status of municipal bonds. There is no guarantee that a municipality will pay interest or repay principal. In addition, the ability of an issuer to make payments or repay interest may be affected by litigation or bankruptcy. In the event of such an issuer's bankruptcy, the Fund could experience delays in collecting principal and interest, and may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in the payment of interest or repayment of principal, or both, a debt holder may, in some instances, take possession of, and manage, the assets securing the issuer's obligations on such securities, which may increase the Fund's operating expenses. Any income derived from the Fund's ownership or operation of such assets may not be tax-exempt. Municipal bonds are generally subject to interest rate, credit and market risk.

Because many municipal bonds are issued to finance similar projects (such as those relating to education, health care, housing, transportation, and utilities), conditions in those sectors may affect the overall municipal securities market. In addition, changes in the financial condition of an individual municipal issuer can affect the overall municipal market. Municipal bonds backed by current or anticipated revenues from a specific project or specific assets can be negatively affected by the discontinuance of the supporting taxation or the inability to collect revenues for the specific project or specific assets. Municipal bonds are subject to the risk that the Internal Revenue Service (the "IRS") may determine that an issuer has not complied with applicable tax requirements and that interest from the municipal bond is taxable, which may result in a significant decline in the value of the security. Municipal bonds may be less liquid than taxable bonds and there may be less publicly available information on the financial condition of municipal bond issuers than for issuers of other securities, and the investment performance of the Fund may therefore, be more dependent on the analytical abilities of the Adviser than if the Fund held other types of investments. The secondary market for municipal bonds also tends to be less well-developed or liquid than many other securities markets, a by-product of lower capital commitments to the asset class by the dealer community, which may adversely affect the Fund's ability to sell municipal bonds at attractive prices or value municipal bonds.

Non-Diversification Risk. Because a relatively high percentage of a non-diversified Fund's assets may be invested in the securities of a limited number of companies that could be in the same or

related economic sectors, the Fund's portfolio may be more susceptible to any single economic, technological or regulatory occurrence than the portfolio of a diversified fund.

Options Market Risk. Markets for options and options on futures may not always operate on a fair and orderly basis. At times, prices for options and options on futures may not represent fair market value and prices may be subject to manipulation, which may be extreme under some circumstances. The dysfunction and manipulation of volatility and options markets may make it difficult for the fund to effectively implement its investment strategy and achieve its objectives and could potentially lead to significant losses.

Options Risk. There are risks associated with the sale and purchase of call and put options. As the seller (writer) of a covered call option, the Fund assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise option price. As the buyer of a put or call option, the Fund risks losing the entire premium invested in the option if the Fund does not exercise the option. As a seller (writer) of a put option, the Fund will lose money if the value of the security falls below the strike price. The use of derivative instruments, such as options, involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments, including the risk that the counterparty to an options transaction may not fulfill its contractual obligations.

Over-the-Counter ("OTC") Trading Risk. Certain of the derivatives in which the Fund may invest may be traded (and privately negotiated) in the OTC market. While the OTC derivatives market is the primary trading venue for many derivatives, it is largely unregulated. As a result and similar to other privately negotiated contracts, the Fund is subject to counterparty credit risk with respect to such derivative contracts.

Portfolio Turnover Risk. Frequent purchases and sales of portfolio securities may result in higher Fund expenses and may result in more significant distributions of short-term capital gains to investors, which are taxed as ordinary income. Increased portfolio turnover causes the Fund to incur higher brokerage costs, which may adversely affect the Fund's performance.

Preferred Stock Risk. The value of preferred stocks will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of preferred stock. Preferred stocks are also subject to credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments. Preferred stock prices tend to move more slowly upwards than common stock prices. In an issuer bankruptcy, preferred stock holders are subordinate to the claims of debtholders and may receive little or no recovery.

Prepayment and Extension Risk for Floating Rate Loans. Prepayment risk is the risk that principal on a debt obligation may be repaid earlier than anticipated. Floating rate loans typically have no or limited call protection and may be prepaid partially or in full at certain times and, in certain circumstances, without penalty. If a floating rate loan is prepaid, the Fund may realize proceeds that

are less than the value that had been assigned to the loan and/or may be forced to reinvest the proceeds in assets with lower yields than the loan that was repaid. Prepayment risk on fixed rate investments is the risk that principal on loans or other obligations underlying a security may be repaid prior to the stated maturity date, which may reduce the market value of the security and the anticipated yield-to-maturity. Extension risk is the risk that an issuer will exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected, which may decrease the value of the obligation and prevent the Fund from investing expected repayment proceeds in instruments paying higher yields.

Prepayment Risk. During periods of declining interest rates, prepayment of loans underlying mortgage-backed and asset-backed securities usually accelerates. Prepayment may shorten the effective maturities of these securities, reducing their yield and market value, and the Fund may have to reinvest at a lower interest rate.

Real Estate and REIT Risk. The Fund is subject to the risks of the real estate market as a whole, such as taxation, regulations and economic and political factors that negatively impact the real estate market and the direct ownership of real estate. These may include decreases in real estate values, overbuilding, rising operating costs, interest rates and property taxes. In addition, some real estate related investments are not fully diversified and are subject to the risks associated with financing a limited number of projects. Investing in REITs involves certain unique risks in addition to those associated with the real estate sector generally. REITs whose underlying properties are concentrated in a particular industry or region are also subject to risks affecting such industries and regions. REITs (especially mortgage REITs) are also subject to interest rate risks. By investing in REITs through the Fund, a shareholder will bear expenses of the REITs in addition to Fund expenses. An entity that fails to qualify as a REIT would be subject to a corporate level tax, would not be entitled to a deduction for dividends paid to its shareholders and would not pass through to its shareholders the character of income earned by the entity.

Real Estate Risk. The Fund is subject to the risks of the real estate market as a whole, such as taxation, regulations and economic and political factors that negatively impact the real estate market and the direct ownership of real estate. These may include decreases in real estate values, overbuilding, rising operating costs, interest rates and property taxes. In addition, some real estate related investments are not fully diversified and are subject to the risks associated with financing a limited number of projects. REITs are heavily dependent upon the management team and are subject to heavy cash flow dependency, defaults by borrowers and self-liquidation.

Regulatory Risk. Changes in the laws or regulations of the United States or other countries, including any changes to applicable tax laws and regulations, could impair the ability of the Fund to achieve its investment objective and could increase the operating expenses of the Fund.

Repurchase and Reverse Repurchase Agreements Risk. The Fund may enter into repurchase agreements in which it purchases a security (known as the “underlying security”) from a securities dealer or bank. In the event of a bankruptcy or other default by the seller of a repurchase agreement,

the Fund could experience delays in liquidating the underlying security and losses in the event of a decline in the value of the underlying security while the Fund is seeking to enforce its rights under the repurchase agreement. Reverse repurchase agreements involve the sale of securities held by the Fund with an agreement to repurchase the securities at an agreed-upon price, date and interest payment, and involve the risk that (i) the other party may fail to return the securities in a timely manner, or at all, and (ii) the market value of assets that are required to be repurchased decline below the purchase price of the asset that has to be sold, resulting in losses to the Fund.

Restricted Securities Risk. The Fund may hold securities that are restricted as to resale under the U.S. federal securities laws. There can be no assurance that a trading market will exist at any time for any particular restricted security. Limitations on the resale of these securities may prevent the Fund from disposing of them promptly at reasonable prices or at all. The Fund may have to bear the expense of registering the securities for resale and the risk of substantial delays in effecting the registration. Also, restricted securities may be difficult to value because market quotations may not be readily available, and the values of restricted securities may have significant volatility.

Risk Management Risk. The measures that the Adviser or portfolio manager use to monitor and manage the risks of the Fund may not accomplish the intended results and the Fund may experience losses significantly greater than expected.

Sector Concentration Risk. Sector concentration risk is the possibility that securities within the same sector will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular sector, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that sector. As a result, the Fund's share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of sectors. Additionally, some sectors could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those sectors may have a material effect on the value of securities issued by companies in those sectors.

Security Risk. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments. There can be no guarantee the securities held by the Fund will appreciate in value. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.

Segregation Risk. In order to secure its obligations to cover its short positions on options, the Fund will either own the underlying assets, enter into offsetting transactions or set aside cash or readily marketable securities. This requirement may cause the Fund to miss favorable trading opportunities, due to a lack of sufficient cash or readily marketable securities. This requirement may also cause the Fund to realize losses on offsetting or terminated derivative contracts or special transactions.

Short Position Risk. The Fund's long positions could decline in value at the same time that the value of the short positions increase, thereby increasing the Fund's overall potential for loss. The Fund's short positions may result in a loss if the price of the short position instruments rise and it costs more to replace the short positions. In contrast to the Fund's long positions, for which the risk of loss is typically limited to the amount invested, the potential loss on the Fund's short positions is potentially large. Market factors may prevent the Fund from closing out a short position at the most desirable time or at a favorable price.

Short Selling Risk. If the price of the security sold short increases between the time of the short sale and the time the Fund covers its short position, the Fund will incur a loss. Also, the Fund is required to deposit collateral in connection with such short sales and may have to pay a fee to borrow particular securities and will often be obligated to pay over any dividends and accrued interest on borrowed securities. These aspects of short selling increase the costs to the Fund and will reduce its rate of return. Additionally, the successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

Small-Cap Companies Risk. The Fund may invest a substantial portion of its assets in small-capitalization companies. Although smaller companies may have potential for rapid growth, they are subject to wider price fluctuations due to factors inherent in their size, such as lack of management experience, lack of profitability and financial resources and limited trade volume and frequency. To make a large sale of securities of smaller companies that trade in limited volumes, the Fund may need to sell portfolio holdings at a discount or make a series of small sales over an extended period of time.

Sovereign Debt Risk. The issuer of the foreign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and the Fund may have limited recourse in the event of a default. The market prices of sovereign debt, and the Fund's net asset value, may be more volatile than prices of U.S. debt obligations and certain emerging markets may encounter difficulties in servicing their debt obligations.

Stock Value Risk. Stocks involve the risk that they may never reach what the Adviser believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the Adviser misgauged that worth. They also may decline in price, even though, in theory, they are already undervalued. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the Fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing only stocks of a particular market capitalization, sector or investment strategy).

Structured Note Risk. The Fund may seek investment exposure to sectors through structured notes that may be exchange traded or may trade in the over the counter market. These notes are typically issued by banks or brokerage firms, and have interest and/or principal payments which are linked to changes in the price level of certain assets or to the price performance of certain

indices. The value of a structured note will be influenced by time to maturity, level of supply and demand for this type of note, interest rate and market volatility, changes in the issuer's credit quality rating, and economic, legal, political, or events that affect the industry. In addition, there may be a lag between a change in the value of the underlying reference asset and the value of the structured note. Structured notes may also be subject to counterparty risk. The Fund may also be exposed to increased transaction costs when it seeks to sell such notes in the secondary market.

Sub-Prime Mortgage Risk. Lower-quality notes, such as those considered "sub-prime" are more likely to default than those considered "prime" by a rating evaluation agency or service provider. An economic downturn or period of rising interest rates could adversely affect the market for sub-prime notes and reduce the Fund's ability to sell these securities. The lack of a liquid market for these securities could decrease the Fund's share price. Additionally, borrowers may seek bankruptcy protection which would delay resolution of security holder claims and may eliminate or materially reduce liquidity.

Swaps Risk. The Fund may use swaps to enhance returns and manage risk. The Fund's use of swaps involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, including futures contracts, permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. The use of leveraged derivatives can magnify the Fund's potential for loss and, therefore, amplify the effects of market volatility on the Fund's share price.

Technology Companies Risk. Technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Technology companies may have limited product lines, markets, financial resources or personnel. The products of technology companies may face obsolescence or adoption challenges due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the technology sector can be heavily dependent on patent and intellectual property rights. The loss or impairment of these rights

may adversely affect the profitability of these companies. Investments in this sector can be highly volatile. Their values may be adversely affected by such factors as, for example, rapid technological change, changes in management personnel, changes in the competitive environment, and changes in investor sentiment. Many technologies companies are small or mid-sized companies and may be newly organized.

Information Technology Companies Risk. Information technology companies face intense competition, potentially rapid product obsolescence, short product cycles, falling prices and profits, and competition from new market entrants.

Communications Companies Risk. Communications companies are subject to the risk that they will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition.

Healthcare Technology and Devices Companies Risk. Companies in this sector may be heavily dependent on clinical trials with uncertain outcomes and decisions made by the governments and regulatory authorities. Further, these companies are dependent on patent protection, and the expiration of patents may adversely affect the profitability of the companies. Additionally, the profitability of some of these companies may be dependent on a relatively limited number of products, and their products can become obsolete due to sector innovation, changes in technologies or other market developments.

Tracking Risk of ETFs. The ETFs in which the Fund may invest will not be able to replicate exactly the performance of the indices or sector they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the ETFs in which the Fund may invest will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the ETFs may, from time to time, temporarily be unavailable, which may further impede the ETFs' ability to track their applicable indices.

Underlying Fund Risk. Other investment companies including mutual funds, ETFs and closed-end funds ("Underlying Funds") in which the Fund invests are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the Underlying Funds and may be higher than other mutual funds that invest directly in stocks and bonds. Each of the Underlying Funds is subject to its own specific risks, but the Adviser expects the principal investments risks of such Underlying Funds will be similar to the risks of investing in the Fund.

Additional risks of investing in ETFs and mutual funds are described below:

Closed-End Fund Risk. Closed-end funds are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing will be higher than the cost of investing directly in a closed-end fund and may be higher than other mutual funds that invest directly in stocks and bonds. Closed-end funds are also subject to management risk because the Adviser to the underlying closed-end fund may be unsuccessful in meeting the fund's investment objective. These funds may also trade at a discount or premium to their net asset value and may trade at a larger discount or smaller premium subsequent to purchase by the Fund. Since closed-end funds trade on exchanges,

the Fund will also incur brokerage expenses and commissions when it buys or sells closed-end fund shares.

ETF Tracking Risk. Investment in the Fund should be made with the understanding that the passive ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the passive ETFs in which the Fund invests will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the passive ETFs may, from time to time, temporarily be unavailable, which may further impede the passive ETFs' ability to track their applicable indices.

Inverse Correlation Risk. Underlying Funds that are inverse funds should lose value as the index or security tracked by such fund's benchmark increases in value; a result that is the opposite from traditional mutual funds. Successful use of inverse funds requires that the Adviser correctly predict short term market movements. If the Fund invests in an inverse fund and markets rise, the Fund could lose money. Inverse funds may also employ leverage such that their returns are more than one times that of their benchmark.

Management Risk. When the Fund invests in Underlying Funds there is a risk that the investment advisers of those Underlying Funds may make investment decisions that are detrimental to the performance of the Fund.

Mutual Fund Risk. Mutual funds are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing will be higher than the cost of investing directly in a mutual fund and may be higher than other mutual funds that invest directly in stocks and bonds. Mutual funds are also subject to management risk because the adviser to the underlying mutual fund may be unsuccessful in meeting the fund's investment objective and may temporarily pursue strategies which are inconsistent with the Fund's investment objective.

Net Asset Value and Market Price Risk. The market value of ETF shares may differ from their net asset value. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when shares trade at a premium or discount to net asset value.

Strategies Risk. Each Underlying Fund is subject to specific risks, depending on the nature of the fund. These risks could include liquidity risk, sector risk, and foreign currency risk, as well as risks associated with fixed income securities and commodities.

U.S. Agency Securities Risk. The Fund may invest in U.S. government or agency obligations. Securities issued or guaranteed by federal agencies and U.S. government sponsored entities may or may not be backed by the full faith and credit of the U.S. government.

U.S. Government Obligations Risk. U.S. Treasury obligations are backed by the “full faith and credit” of the U.S. government and generally have negligible credit risk. Securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government. The Fund may be subject to such risk to the extent it invests in securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises.

Volatility Risk. The Fund’s performance may be volatile, which means that the Fund’s performance may be subject to substantial short term changes up or down.

Yieldcos Risk. Investments in securities of yieldcos involve risks that differ from investments in traditional operating companies, including risks related to the relationship between the yieldco and the company responsible for the formation of the yieldco (the “Yieldco Sponsor”). Yieldcos typically remain dependent on the management and administration services provided by or under the direction of the Yieldco Sponsor and on the ability of the Yieldco Sponsor to identify and present the yieldco with acquisition opportunities, which may often be assets of the Yieldco Sponsor itself. To the extent that the yieldco relies on the Yieldco Sponsor for developing new assets for potential future acquisitions, the yieldco may be dependent on the development capabilities and financial health of the Yieldco Sponsor. Yieldco Sponsors may have interests that conflict with the interests of the yieldco, and may retain control of the yieldco via classes of stock held by the Yieldco Sponsor. Congress voted not to extend bonus depreciation in 2015 for qualifying capital equipment, meaning new yieldco assets could be subject to slower depreciation schedules and less ability to minimize tax liabilities. Additionally, Congress could vote to eliminate production tax credits (“PTCs”) for green energy projects, which could reduce the profitability of companies, including yieldcos that operate in the renewable energy space. Yieldco securities can be affected by macro-economic and other factors affecting the stock market in general, expectations of interest rates, investor sentiment towards yieldcos or the energy sector, changes in a particular issuer’s financial condition, or unfavorable or unanticipated poor performance of a particular issuer (in the case of yieldcos, generally measured in terms of distributable cash flow). A yieldco’s share price is typically a multiple of its distributable cash flow. Therefore any event that limits the yieldco’s ability to maintain or grow its distributable cash flow would likely have a negative impact on the yieldco’s share price. Prices of yieldco securities also can be affected by fundamentals unique to the company, including the robustness and consistency of its earnings and its ability to meet debt obligations including the payment of interest and principle to creditors. Yieldcos may distribute all or substantially all of the cash available for distribution, which may limit new acquisitions and future growth. Yieldcos may finance its growth strategy with debt, which may increase the yieldco’s leverage and the risks associated with the yieldco. The ability of a yieldco to maintain or grow its dividend distributions may depend on the entity’s ability to minimize its tax liabilities through the use of accelerated

depreciation schedules, tax loss carryforwards, and tax incentives. Changes to the current tax code could result in greater tax liabilities, which would reduce the yieldco's distributable cash flow.

Portfolio Holdings Disclosure Policies

A description of the Fund's policies regarding disclosure of the securities in the Fund's portfolio is found in the SAI.

Cybersecurity

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

HOW TO BUY SHARES

Purchasing Shares

You may buy shares on any business day. This includes any day that the Fund is open for business, other than weekends and days on which the New York Stock Exchange (“NYSE”) is closed, including the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas Day.

The Fund calculates its net asset value (“NAV”) per share as of the close of regular trading on the NYSE every day the NYSE is open. The NYSE normally closes at 4:00 p.m. Eastern Time (“ET”). The Fund’s NAV is calculated by taking the total value of the Fund’s assets, subtracting its liabilities, and then dividing by the total number of shares outstanding, rounded to the nearest cent.

All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (ET) will be processed on that same day. Requests received after 4:00 p.m. will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. “Good order” means your purchase request includes:

- the name of the Fund and share class
- the dollar amount of shares to be purchased
- a completed purchase application or investment stub
- check payable to the applicable Fund

Sales Charge Waivers and Reductions Available Through Certain Financial Intermediaries

The availability of certain sales charge waivers and discounts may depend on whether you purchase your shares directly from the fund or through a financial intermediary. Intermediaries may impose different sales charges other than those listed below for Class A and Class C shares and may have different policies and procedures regarding the availability of sales load and waivers or reductions. Such intermediary-specific sales charge variations are described in Appendix A to this prospectus, titled “Intermediary-Specific Sales Charge Reductions and Waivers”. Appendix A is incorporated by reference into (or legally considered part of) this prospectus.

In all instances, it is the shareholder’s responsibility to notify the Fund or the shareholder’s financial intermediary at the time of purchase of any relationship or other facts qualifying the shareholder for sales charge reductions or waivers. For reductions and waivers not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Fund or through another intermediary to receive these reductions or waivers.

Multiple Classes

The Fund offers Class A, Class C, Class N and Class I shares in the prospectus. Each Class of shares has a different distribution arrangement and expenses to provide for different investment needs. Additionally, Class I shares have a minimum initial investment amount of \$100,000. This allows you to choose the class of shares most suitable for you depending on the amount and length of investment and other relevant factors. Sales personnel may receive different compensation for selling each class of shares. Each class of shares represents an interest in the same portfolio of investments in the Fund. Not all share classes may be available in all states.

Class A Shares

You can buy Class A shares at the public offering price, which is the NAV plus an up-front sales charge. You may qualify for a reduced sales charge as described below. The up-front sales charge also does not apply to Class A shares acquired through reinvestment of dividends and capital gains distributions. Intermediaries may impose different sales charges other than those listed below for Class A shares and may have different policies and procedures regarding the availability of sales load and waivers or reductions. Such intermediary-specific sales charge variations are described in Appendix A to this prospectus, titled "Intermediary-Specific Sales Charge Reductions and Waivers." Class A shares are subject to a 12b-1 fee of 0.25% that is lower than the 12b-1 fee for the Class C shares of 1.00%, and higher than the 12b-1 fee for Class N shares of 0.20%.

The up-front Class A sales charge and the commissions payable by you at the time of investment to dealers for the Fund is as follows:

Amount of Purchase	Sales Charge (% of Public Offering Price)	Sales Charge (% of Net Amount Invested)	Authorized Dealer Commission (% of Public Offering Price)
Less than \$50,000	5.75%	6.10%	5.00%
\$50,000 but less than \$100,000	4.75%	4.99%	4.00%
\$100,000 but less than \$250,000	4.00%	4.17%	3.25%
\$250,000 but less than \$500,000	3.00%	3.09%	2.50%
\$500,000 but less than \$1,000,000	2.50%	2.56%	2.00%
\$1,000,000 and above ¹	0.00%	0.00%	0.00%

1. In the case of investments at or above the \$1 million breakpoint (where you do not pay an initial sales charge), a 1.00% contingent deferred sales charge ("CDSC") may be assessed on shares redeemed within eighteen months of purchase. As explained below, the CDSC for these Class A shares is based on the NAV at the time of purchase. The holding period for the CDSC begins on the day you buy your shares. Some intermediaries may waive or discount the CDSC under certain circumstances. Please refer to Appendix A to this prospectus, titled, "Intermediary-Specific Sales Charge Reductions and Waivers" for more information. The Adviser may pay a 1.00% commission out of its own resources to broker-dealers who initiate and are responsible for the purchase of shares of \$1 million or more.

Class A Sales Charge Reductions.

We offer a number of ways to reduce or eliminate the up-front sales charge on Class A shares. Reduced sales charges are available to shareholders with investments of \$50,000 or more. In addition, you may qualify for reduced sales charges under the following circumstances.

Letter of Intent. An investor may qualify for a reduced sales charge immediately by stating his or her intention to invest in the Fund, during a 13-month period, an amount that would qualify for a reduced sales charge and by signing a Letter of Intent, which may be signed at any time within 90 days after the first investment to be included under the Letter of Intent. However, if an investor does not buy enough shares to qualify for the lower sales charge by the end of the 13-month period (or when you sell your shares, if earlier), the additional shares that were purchased due to the reduced sales charge credit the investor received will be liquidated to pay the additional sales charge owed.

Rights of Accumulation. You may add the current value of all of your existing Eventide Fund shares to determine the front-end sales charge to be applied to your current Class A purchase. Only balances currently held entirely at the Fund or, if held in an account through a financial services firm, at the same firm through whom you are making your current purchase, will be eligible to be added to your current purchase for purposes of determining your Class A sales charge. You may include the value of investments in funds advised by the Adviser held by the members of your immediate family, including the value of investments held by you or them in individual retirement plans, such as individual retirement accounts, or IRAs, provided such balances are also currently held entirely at the Fund or, if held in an account through a financial services firm, at the same financial services firm through whom you are making your current purchase. The value of shares eligible for a cumulative quantity discount equals the cumulative cost of the shares purchased (not including reinvested dividends) or the current account market value; whichever is greater. The current market value of the shares is determined by multiplying the number of shares by the previous day's NAV. If you believe there are cumulative quantity discount eligible shares that can be combined with your current purchase to achieve a sales charge breakpoint, you must, at the time of your purchase (including at the time of any future purchase) specifically identify those shares to your current purchase broker-dealer.

Class A Sales Charge Waivers. The Fund may sell Class A shares at NAV (i.e. without the investor paying any initial sales charge) to certain categories of investors, including: (1) investment advisory clients or investors referred by the Adviser or its affiliates; (2) officers and present or former Trustees; directors and employees of selected dealers or agents; the spouse, sibling, direct ancestor or direct descendant (collectively "relatives") of any such person; any trust, individual retirement account or retirement plan account for the benefit of any such person or relative; or the estate of any such person or relative; if such shares are purchased for investment purposes (such shares may not be resold except to the Fund); (3) the Adviser or its affiliates and certain employee benefit plans for employees of the Adviser; (4) fee-based financial planners and registered investment advisers who are purchasing on behalf of their clients where there is an agreement in place with respect to such purchases; (5) registered representatives of broker-dealers who have entered into selling agreements

with the Adviser for their own accounts; and (6) participants in no-transaction-fee programs of broker dealers that have entered into an agreement with the Fund, Adviser or Distributor with respect to such purchases.

For more information regarding which intermediaries may have agreements with the Fund or distributor and their policies and procedures with respect to purchases at NAV, see Appendix A to this prospectus, titled "Intermediary-Specific Sales Charge Reductions and Waivers".

Reinvestment Privilege. Within 90 days of redeeming certain Class A shares, the redemption proceeds may be reinvested without a sales charge in Class A shares of any fund in the Eventide family of funds. This privilege applies to redemptions of Class A shares that were subject to an initial sales charge. You or your financial adviser must ask the Fund's transfer agent for this privilege in writing at the time of reinvestment and must identify the account from which the redemption was made.

Investments of \$1 Million or More: For the Fund, with respect to Class A shares, if you invest \$1 million or more, either as a lump sum or through our rights of accumulation quantity discount or letter of intent programs, you can buy Class A shares without an initial sales charge. However, you may be subject to a 1.00% CDSC on shares redeemed within eighteen months of purchase (excluding shares purchased with reinvested dividends and/or distributions). The CDSC for these Class A shares is based on the NAV at the time of purchase. The holding period for the CDSC begins on the day you buy your shares. Your shares will age one month on that same date the next month and each following month. For example, if you buy shares on the 15th of the month, they will age one month on the 15th day of the next month and each following month. To keep your CDSC as low as possible, each time you place a request to sell shares we will first sell any shares in your account that are not subject to a CDSC. If there are not enough of these to meet your request, we will sell the shares in the order they were purchased.

Additional information is available by calling 877-771-3836. Your financial adviser can also help you prepare any necessary application forms. You or your financial adviser must notify the Fund at the time of each purchase if you are eligible for any of these programs. The Fund may modify or discontinue these programs at any time. Information on sales charge reductions and/or waivers is not separately available on the Fund's website because it is contained in this Prospectus.

Certain intermediaries may provide for different sales charge discounts which are described in Appendix A to this prospectus, entitled "Intermediary-Specific Charge Reductions and Waivers".

Class C Shares

You can buy class C shares at NAV. Class C shares are subject to a 12b-1 fee of 1.00% of the Fund's average daily net assets, payable to the adviser or selected dealers. Because Class C shares pay a higher 12b-1 fee than Class A shares, Class C shares have higher ongoing expenses than Class A shares.

Class N Shares

You can buy class N shares at NAV. Class N shares are subject to a 12b-1 fee of 0.20% of the Fund's average daily net assets, payable to the adviser or selected dealers.

Class I Shares

You can buy Class I shares at NAV. Sales of Class I shares are not subject to a front-end sales charge or an annual 12b-1 fee. Availability of Class I shares is subject to agreement between the distributor and financial intermediary. Class I shares may also be available on certain brokerage platforms. An investor transacting in Class I shares through a broker acting as an agent for the investor may be required to pay a commission and/or other forms of compensation to the broker.

Distribution Plans

The Fund has adopted distribution and service plans under Rule 12b-1 of the 1940 Act that allows the Fund to pay distribution and/or service fees in connection with the distribution of its Class A, Class C and Class N shares and for services provided to shareholders. Because these fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Class A Shares

Under the Fund's Plan related to the Class A shares, the Fund may pay an annual fee of up to 0.50% of the average daily net assets of the Fund's Class A shares for shareholder services and distribution related expenses. The Fund is currently paying a 12b-1 fee of up to 0.25% of its average daily net assets. If authorized by the Board of Trustees and upon notice to shareholders, the Fund may increase the percentage paid under the Plan up to the Class A 12b-1 Fee amount. All or a portion of the distribution and services fees may be paid to your financial adviser for providing ongoing services to you.

Class C Shares

Under the Fund's Plan related to the Class C shares, the Fund may pay an annual fee of up to 1.00% of the average daily net assets of the Fund's Class C shares. A portion of the distribution and services fees may be paid to your financial adviser for providing ongoing service to you.

Class N Shares

Under the Fund's Plan related to the Class N shares, the Fund may pay an annual fee of up to 0.25% of the average daily net assets of the Fund's Class N shares for shareholder services and distribution related expenses. The Fund is currently paying a 12b-1 fee of up to 0.20% for the Class N shares.

Opening an Account

You may purchase shares directly through the Fund's transfer agent or through a brokerage firm or other financial institution that has agreed to sell Fund shares. If you purchase shares through a brokerage firm or other financial institution, you may be charged a fee by the firm or institution.

If you are investing directly in the Fund for the first time, please call toll-free 877-771-3836 or visit www.eventidefunds.com to request a Shareholder Account Application. You will need to establish an account before investing. Be sure to sign up for all the account options that you plan to take advantage of. For example, if you would like to be able to redeem your shares by telephone, you should select this option on your Shareholder Account Application. Doing so when you open your account means that you will not need to complete additional paperwork later.

If you are purchasing through the Fund's transfer agent, send the completed Shareholder Account Application and a check payable to the Fund to the following address:

Elkhorn, Nebraska 68022-3474

All purchases must be made in U.S. dollars and checks must be drawn on U.S. banks. No cash, credit cards or third party checks will be accepted. Redemptions of shares of the Fund purchased by check may be subject to a hold period until the check has been cleared by the issuing bank. To avoid such holding periods, shares may be purchased through a broker or by wire, as described in this section. A \$20 fee will be charged against your account for any payment check returned to the transfer agent or for any incomplete electronic funds transfer, or for insufficient funds, stop payment, closed account or other reasons. If a check does not clear your bank or the Fund is unable to debit your predesignated bank account on the day of purchase, the Fund reserves the right to cancel the purchase. If your purchase is canceled, you will be responsible for any losses or fees imposed by your bank and losses that may be incurred as a result of a decline in the value of the canceled purchase. Your investment in the Fund should be intended to serve as a long-term investment vehicle. The Fund is not designed to provide you with a means of speculating on the short-term fluctuations in the stock market. The Fund reserves the right to reject any purchase request that it regards as disruptive to the efficient management of the Fund, which includes investors with a history of excessive trading. The Fund also reserves the right to stop offering shares at any time.

If you choose to pay by wire, you must call the Fund's transfer agent, at 877-771-3836 to obtain instructions on how to set up your account and to obtain an account number and wire instructions.

Wire orders will be accepted only on a day on which the Fund's custodian and transfer agent are open for business. A wire purchase will not be considered made until the wired money and purchase order are received by the Fund. Any delays that may occur in wiring money, including delays that may occur in processing by the banks, are not the responsibility of the Fund or the transfer agent. The Fund presently does not charge a fee for the receipt of wired funds, but the Fund may charge shareholders for this service in the future.

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. This means that when you open an account, we will ask for your name, address, date of birth, and other information that will allow us to identify you. We may also ask for other identifying documents or information, and may take additional steps to verify your identity. We may not be able to open your account or complete a transaction for you until we are able to verify your identity.

Minimum Purchase Amount

The minimum initial investment in Class A, Class C and Class N shares of the Fund is \$1,000 for a regular account, \$1,000 for an IRA account, or \$100 for an automatic investment plan account. The minimum initial investment in Class I shares is \$100,000 for all accounts. The Fund reserves the right to change the amount of these minimums from time to time or to waive them in whole or in part for certain accounts. Investment minimums may be higher or lower for investors purchasing shares through a brokerage firm or other financial institution. To the extent investments of individual investors are aggregated into an omnibus account established by an investment adviser, broker or other intermediary, the account minimums apply to the omnibus account, not to the account of the individual investor.

Automatic Investment Plan

You may open an automatic investment plan account with a \$100 initial purchase and a \$100 monthly investment. If you have an existing account that does not include the automatic investment plan, you can contact the Fund's transfer agent to establish an automatic investment plan. The automatic investment plan provides a convenient method to have monies deducted directly from your bank account for investment in the Fund. You may authorize the automatic withdrawal of funds from your bank account for a minimum amount of \$100. The Fund may alter, modify or terminate this plan at any time. To begin participating in this plan, please complete the Automatic Investment Plan Section found on the application or contact the Fund at 877-771-3836.

Additional Investments

The minimum subsequent investment in the Fund is \$50. You may purchase additional shares of the Fund by check or wire. Your bank wire should be sent as outlined above. You also may purchase Fund shares by making automatic periodic investments from your bank account. To use this feature,

select the automatic investment option in the account application and provide the necessary information about the bank account from which your investments will be made. You may revoke your election to make automatic investments by calling 877-771-3836 or by writing to the Fund at:

Other Purchase Information

The Fund may limit the amount of purchases and refuse to sell to any person. If your electronic funds transfer is incomplete, payment is not completed due to insufficient funds, stop payment, closed account, a check does not clear your bank, or the Fund is unable to debit your predesignated bank account, you will be responsible for any loss incurred by the Fund. If you are already a shareholder, the Fund can, with notice, redeem shares from any identically registered account in the Fund as reimbursement for any loss incurred. You may be prohibited or restricted from making future purchases in the Fund.

The Fund has authorized certain broker-dealers and other financial institutions (including their designated intermediaries) to accept on its behalf purchase and sell orders. These broker-dealers and financial institutions may charge a fee for their services. The Fund is deemed to have received an order when the authorized person or designee receives the order, and the order is processed at the NAV next calculated thereafter. It is the responsibility of the broker-dealer or other financial institution to transmit orders promptly to the Fund's transfer agent.

Market Timing

The Fund discourages market timing. Market timing is an investment strategy using frequent purchases, redemptions and/or exchanges in an attempt to profit from short term market movements. To the extent that the Fund significantly invests in small or mid-capitalization equity securities or derivative investments, because these securities are often infrequently traded, investors may seek to trade Fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Market timing may result in dilution of the value of Fund shares held by long term shareholders, disrupt portfolio management and increase Fund expenses for all shareholders. The Board has adopted a policy directing the Fund to reject any purchase order with respect to one investor, a related group of investors or their agent(s), where it detects a pattern of purchases and sales of the Fund that indicates market timing or trading that it determines is abusive. This policy applies uniformly to all Fund shareholders. While the Fund attempts to deter market timing, there is no assurance that they will be able to identify and eliminate all market timers. For example, certain accounts called "omnibus accounts" include multiple shareholders. Omnibus

accounts typically provide the Fund with a net purchase or redemption request on any given day where purchasers of Fund shares and redeemers of Fund shares are netted against one another and the identities of individual purchasers and redeemers whose orders are aggregated are not known by the Fund. The netting effect often makes it more difficult for the Fund to detect market timing, and there can be no assurance that the Fund will be able to do so.

HOW TO REDEEM SHARES

You may redeem your shares on any business day. Redemption orders received in proper order by the Fund's transfer agent or by a brokerage firm or other financial institution that sells Fund shares, authorized to accept redemption orders on the Fund's behalf, before 4:00 p.m. ET (or before the NYSE closes if the NYSE closes before 4:00 p.m. ET) will be effective at that day's NAV. . If you purchased shares using a check and soon after request a redemption, your redemption proceeds, which are payable at the next determined NAV following the receipt your redemption request in "good order", as described below, will not be sent until the check used for your purchase has cleared your bank.

The Fund typically expects that it will take up to seven calendar days following the receipt of your redemption request by any method to pay out redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of Fund shares, any lines of credit, and then from the sale of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions.

Shares of the Fund may be redeemed by mail or telephone. You may receive redemption payments in the form of a check or federal wire transfer, subject to any applicable redemption fee. A wire transfer fee of \$15 may be charged to defray custodial charges for redemptions paid by wire transfer. Any charges for wire redemptions will be deducted from your account by redemption of shares.

By Mail. You may redeem any part of your account in the Fund at no charge by mail. Your request, in good order, should be addressed to:

Regular Mail

Eventide Funds
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail

Eventide Funds
c/o Gemini Fund Services, LLC
4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 68022-3474

Good Order means your request for redemption must include:

- the Fund name and account number
- the account name(s) and address
- the dollar amount or number of shares to be redeemed
- signatures of all registered share owners in the exact names and any special capacities in which they are registered

The Fund may require that the signatures be guaranteed if the mailing address of the account has been changed within 30 days of the redemption request. The Fund may also require that signatures be guaranteed for redemptions of \$100,000 or more. Signature guarantees are for the protection of shareholders. You can obtain a signature guarantee from most banks and securities dealers, but not from a notary public. For joint accounts, both signatures must be guaranteed. Please call the transfer agent at 877-771-3836 if you have questions. At the discretion of the Fund, you may be required to furnish additional legal documents to insure proper authorization. The Fund will not make checks payable to anyone other than the shareholder of record.

By Telephone. You may redeem any part of your account in the Fund by calling the transfer agent at 877-771-3836. You must first complete the Optional Telephone Redemption and Exchange section of the investment application to institute this option. The Fund, the transfer agent and the custodian are not liable for following redemption instructions communicated by telephone to the extent that they reasonably believe the telephone instructions to be genuine. However, if they do not employ reasonable procedures to confirm that telephone instructions are genuine, they may be liable for any losses due to unauthorized or fraudulent instructions. Procedures employed may include recording telephone instructions and requiring a form of personal identification from the caller.

The Fund may terminate the telephone redemption procedures at any time. During periods of extreme market activity it is possible that shareholders may encounter some difficulty in telephoning the Fund, although neither the Fund nor the transfer agent have ever experienced difficulties in receiving and in a timely fashion responding to telephone requests for redemptions or exchanges. If you are unable to reach The Fund by telephone, you may request a redemption or exchange by mail.

Redemption Fee.

The Fund charges a 1.00% redemption fee on Fund shares redeemed within less than 180 days of purchase. Shares held longest will be treated as being redeemed first and shares held for the shortest amount of time will be treated as being redeemed last. Shares held for 180 days or more are not subject to the 1.00% fee. Redemption fees are paid to the Fund directly and are designed to offset costs associated with fluctuations in Fund asset levels and cash flow caused by short-term

shareholder trading. A shareholder of a Fund who requests that the proceeds of a redemption be sent by wire will be charged a \$15 fee.

Waivers of Redemption Fees. The Fund has elected not to impose the redemption fee for:

- Redemptions and exchanges of Fund shares acquired through the reinvestment of dividends and distributions;
- Redemptions and exchanges of Fund shares owned through participant-directed retirement plans;
- Redemptions or exchanges in discretionary asset allocation, fee based or wrap programs (“wrap programs”) that are initiated by the sponsor/financial adviser as part of a periodic rebalancing;
- Redemptions or exchanges in a fee based or wrap program that are made as a result of a full withdrawal from the wrap program or as part of a systematic withdrawal plan;
- Involuntary redemptions, such as those resulting from a shareholder’s failure to maintain a minimum investment in the Fund, or to pay shareholder fees; or
- Other types of redemptions as the Adviser or the Trust may determine in special situations and approved by the Trust’s or the Adviser’s Chief Compliance Officer.

The Fund reserves the right to modify the redemption fee or waivers at any time. If there is a material change to the Fund’s redemption fee policy, the Fund will notify you at least 60 days prior to the effective date of the change.

Redemptions in Kind. The Fund reserves the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities (“redemption in kind”) if the amount is greater than the lesser of \$250,000 or 1% of the Fund’s assets. The securities will be chosen by the Fund and valued under the Fund’s net asset value procedures. A shareholder will be exposed to market risk until these securities are converted to cash and may incur transaction expenses in converting these securities to cash. However, the Board has determined that, until otherwise approved by the Board, all redemptions in the Fund be made in cash only. If the Board determines to allow the Fund to redeem in kind in the future, the Fund will provide shareholders with notice of such change to the redemption policy.

Additional Information. If you are not certain of the requirements for redemption please call the Fund at 877-771-3836. Redemptions specifying a certain date or share price cannot be accepted and will be returned. You may be assessed a fee if the Fund incurs bank charges because you request that the Fund re-issue a redemption check. Also, when the NYSE is closed (or when trading is restricted) for any reason other than its customary weekend or holiday closing or under any emergency circumstances, as determined by the SEC, the Fund may suspend redemptions or postpone payment dates.

Because the Fund incurs certain fixed costs in maintaining shareholder accounts, the Fund may require you to redeem all of your shares in the Fund on 30 days written notice if the value of your shares in the Fund is less than \$1,000 due to redemption, or such other minimum amount as the Fund may determine from time to time. You may increase the value of your shares in the Fund to the minimum amount within the 30-day period. All shares of the Fund are also subject to

involuntary redemption if the Board determines to liquidate the Fund. An involuntary redemption will create a capital gain or a capital loss, which may have tax consequences about which you should consult your tax adviser.

Exchange Privilege

You may exchange shares of a particular class of the Fund only for shares of the same class of another fund in the Eventide family of funds. For example, you can exchange Class A shares of the Fund for Class A shares of the Eventide Gilead Fund. Shares of the fund selected for exchange must be available for sale in your state of residence. You must meet the minimum purchase requirements for the fund you purchase by exchange. For tax purposes, exchanges of shares involve a sale of shares of the Fund you own and a purchase of the shares of the other Eventide Fund, which may result in a capital gain or loss. In order to exchange shares of the Fund on a particular day, the Fund or its designated agent must receive your request before the close of regular trading on the NYSE (normally 4:00 p.m. Eastern Time) that day. Exchanges are made at the NAV determined after the order is considered received. You will not be charged the upfront sales charge or the CDSC on the exchanges of Class A shares.

Converting Shares

Shareholders of the Fund may elect on a voluntary basis to convert their shares in one class of the Fund into shares of a different class of the Fund, subject to satisfying the eligibility requirements for investment in the new share class.

Shares held through a financial intermediary offering different programs and fee structures that has an agreement with the Adviser or the Fund's distributor may be converted by the financial intermediary, without notice, to another share class of the Fund, including share classes with a higher expense ratio than the original share class, if such conversion is consistent with the fee-based or wrap fee program's policies.

An investor may directly or through his or her financial intermediary contact the Fund to request a voluntary conversion between share classes of the Fund as described above. You may be required to provide sufficient information to establish eligibility to convert to the new share class.

Class C shares convert automatically to Class A shares after ten years (unless otherwise provided by your financial intermediary), provided that the financial intermediary through which you purchased Class C shares has records verifying that the Class C shares have been held for at least ten years. Under the Funds' Plan related to Class A shares, each Fund may pay an annual fee of up to 0.50% of the average daily net assets of its Class A shares (the "Class A 12b-1 Fee") for shareholder services and distribution related expenses (Class C shares presently pay a 1.00% 12b-1 fee). Each Fund is currently paying a Class A 12b-1 Fee of 0.25% of its average daily net assets. If authorized by the Board and upon notice to the shareholders, a Fund may increase the percentage paid under the 12b-1 Plan up to the Class A 12b-1 Fee amount. Because these fees are paid out of each Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more

than paying other types of sales charges.” You should consult your financial representative for more information about eligibility for Class C share conversion. All permissible conversions will be made on the basis of the relevant NAVs of the two classes without the imposition of any front-end sales load. A share conversion within a Fund will not result in a capital gain or loss for federal income tax purposes. The Funds may change, suspend or terminate these conversion features at any time.

VALUING THE FUND’S ASSETS

The Fund’s assets are generally valued at their market value. If market prices are not available or, in the adviser’s opinion, market prices do not reflect fair value, or if an event occurs after the close of trading on the domestic or foreign exchange or market on which the security is principally traded (but prior to the time the NAV is calculated) that materially affects fair value, the Adviser will value the Fund’s assets at its fair value according to policies approved by the Board. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund’s fair value pricing guidelines. In these cases, the Fund’s NAV will reflect certain portfolio securities’ fair value rather than their market price. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security is materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. Without a fair value price, short term traders could take advantage of the arbitrage opportunity and dilute the NAV of long term investors. Securities trading on overseas markets present time zone arbitrage opportunities when events effecting portfolio security values occur after the close of the overseas market, but prior to the close of the U.S. market. Fair valuation of the Fund’s securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The Fund may use pricing services to determine market value. The NAV for the Fund investing in other investment companies is calculated based upon the NAV of the underlying investment companies in its portfolio, and the prospectuses of those companies explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing. Because the Fund may invest in securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the Fund does not price its shares, the value of some of the Fund’s portfolio securities may change on days when you may not be able to buy or sell Fund shares.

DIVIDENDS, DISTRIBUTIONS & TAXES

Dividends and Distributions

The Fund typically distributes substantially all of its net investment income in the form of dividends, interest and taxable capital gains to its shareholders. These distributions are automatically reinvested in the Fund unless you request cash distributions on your application or through a written request

to the Fund. The Fund expects that its distributions will consist of both capital gains, interest and dividend income. The Fund may make distributions of its net realized capital gains (after any reductions for capital loss carry forwards) annually.

Taxes

In general, selling shares of the Fund and receiving distributions (whether reinvested or taken in cash) are taxable events. Depending on the purchase price and the sale price, you may have a gain or a loss on any shares sold. Any tax liabilities generated by your transactions or by receiving distributions are your responsibility. You may want to avoid making a substantial investment when the Fund is about to make a taxable distribution because you would be responsible for any taxes on the distribution regardless of how long you have owned your shares. The Fund may produce capital gains even if it does not have income to distribute and performance has been poor.

Early each year, the Fund will mail to you a statement setting forth the federal income tax information for all distributions made during the previous year. If you do not provide your taxpayer identification number, your account will be subject to backup withholding.

The tax considerations described in this section do not apply to tax-deferred accounts or other non-taxable entities. Because each investor's tax circumstances are unique, please consult with your tax adviser about your investment.

MANAGEMENT OF THE FUND

Adviser

Eventide Asset Management, LLC, a Delaware limited liability company located at One International Place, Suite 4210, Boston, Massachusetts 02110, serves as Adviser to the Fund. The Adviser was formed in April 2008. Management of mutual funds is currently its primary business. Under the terms of the management agreement, the Adviser is responsible for formulating the Fund's investment policies, making ongoing investment decisions and engaging in portfolio transactions.

Portfolio Manager

Anant Goel, MBA, serves as the portfolio manager of the Fund.

Anant Goel

Anant Goel, MBA, has served as a Research Analyst of the Adviser since 2016, leading its technology-focused research since 2016. Mr. Goel has served as the portfolio manager of the Eventide Exponential Technologies Fund since it commenced operations in June 2020.

Mr. Goel has a diverse background having grown up and lived in India, Hong Kong, UK, USA and China, which combined with his academic and professional interests, allow him to incorporate a diverse set of perspectives in his investment decision process.

Mr. Goel has been passionate about responsible investing from early in his career. From 2011-2014, he served as an Analyst for NewQuest Capital Partners, a Private Equity firm in Hong Kong, where he was responsible for evaluating new investment opportunities for funds across Asia. In 2015, during his MBA program, Mr. Goel worked at Adage Capital Management, a long/short hedge fund. From 2008-2011, Mr. Goel lived and worked in Beijing, China where he studied Mandarin and worked on start-up companies and other investment projects.

Mr. Goel holds an MBA from the MIT Sloan School of Management where he was selected as a Teaching Assistant (TA) for finance courses for both Executive MBA and MBA students. He also holds a Bachelors of Science (HONS) from the University of Warwick, UK in Economics. Mr. Goel has completed his CFA Level II.

The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed and ownership of securities in the Fund.

Advisory Fees

The Fund is authorized to pay the Adviser an annual fee based on its average daily net assets. The advisory fee is paid monthly. The Adviser has contractually agreed to waive fees and/or reimburse expenses, but only to the extent necessary to maintain the Fund's total annual operating expenses (excluding front-end or contingent deferred loads, leverage interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, dividend expense on securities sold short, underlying fund fees and expenses or extraordinary expenses such as litigation) at a certain level through October 31, 2021. This agreement may only be terminated by the Board of Trustees on 60 days' written notice to the Adviser and upon the termination of the Management Agreement between the Trust and the Adviser. Fee waivers and expense reimbursements are subject to possible recoupment by the Adviser from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the lesser of the expense limitation in place at the time of waiver/reimbursement and the expense limitation in place at the time of recapture.

The following table describes (i) the contractual advisory fee, and (ii) the expense limitation for the Fund.

	Contractual Advisory Fee	Expense Limitation
Exponential Technologies Fund	1.10%	Class A: 1.68% Class C: 2.43% Class N: 1.63% Class I: 1.43%

The Adviser intends that a portion of its profits from managing the Fund will be contributed to charities and service organizations. The Adviser may pay certain financial institutions (which may include banks, brokers, securities dealers and other industry professionals) a fee for providing distribution related services to the Fund's shareholders to the extent these institutions are allowed to do so by applicable statute, rule or regulation. A discussion regarding the basis of the Board of Trustees' approval of the management agreement with the Adviser on behalf of the Fund will be available in the Fund's semi-annual report to shareholders for the period ended December 31, 2020.

APPENDIX A:

INTERMEDIARY-SPECIFIC SALES CHARGE REDUCTIONS AND WAIVERS

Specific intermediaries may have different policies and procedures regarding the availability of sales charge reductions and waivers, which are discussed below. In all instances, it is the shareholder's responsibility to notify the Fund or the shareholder's financial intermediary at the time of purchase of any relationship or other facts qualifying the shareholder for sales charge reductions or waivers.

Each Financial Intermediary provided the information below with respect to its policies and procedures regarding sales charge reductions and waivers. The Fund is not responsible for the accuracy of the information.

MERRILL LYNCH

Shareholders purchasing Fund shares through a Merrill Lynch platform or account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's prospectus or SAI.

Front-end Sales Load Waivers on Class A Shares available at Merrill Lynch

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by or through a 529 Plan
- Shares purchased through a Merrill Lynch affiliated investment advisory program
- Shares purchased by third party investment advisers on behalf of their advisory clients through Merrill Lynch's platform
- Shares of funds purchased through the Merrill Edge Self-Directed platform (if applicable)
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the Trust advised by the Adviser (the "fund family"))
- Shares exchanged from Class C (i.e. level-load) shares of the same fund in the month of or following the 10-year anniversary of the purchase date
- Employees and registered representatives of Merrill Lynch or its affiliates and their family members
- Directors or Trustees of the Fund, and employees of the Fund's investment adviser or any of its affiliates, as described in the prospectus
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement)

CDSC Waivers on A and C Shares available at Merrill Lynch

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching age 70½
- Shares sold to pay Merrill Lynch fees but only if the transaction is initiated by Merrill Lynch
- Shares acquired through a right of reinstatement
- Shares held in retirement brokerage accounts, that are exchanged for a lower cost share class due to transfer to certain fee based accounts or platforms (applicable to A shares only)

Front-end load Discounts Available at Merrill Lynch: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in this prospectus
- Rights of Accumulation (ROA) which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Merrill Lynch. Eligible fund family assets not held at Merrill Lynch may be included in the ROA calculation only if the shareholder notifies his or her financial adviser about such assets
- Letters of Intent (LOI) which allow for breakpoint discounts based on anticipated purchases within a fund family, through Merrill Lynch, over a 13-month period of time

RBC CAPITAL MARKETS, LLC ("RBC")*Front-end Sales Load Waivers on Class A Shares available at RBC*

- Employee-sponsored retirement plans.

MORGAN STANLEY WEALTH MANAGEMENT

Effective July 1, 2018, shareholders purchasing Fund shares through a Morgan Stanley Wealth Management ("Morgan Stanley") transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from and may be more limited than those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-end Sales Charge Waivers on Class A Shares available at Morgan Stanley

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account

- Class C (i.e., level-load) shares that are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program
- Shares purchased from the proceeds of redemptions within the same fund family, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge.

RAYMOND JAMES & ASSOCIATES, INC., RAYMOND JAMES FINANCIAL SERVICES, INC. & RAYMOND JAMES AFFILIATES ("RAYMOND JAMES")

Effective March 1, 2019, shareholders purchasing fund shares through a Raymond James platform or account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or SAI.

Front-end sales load waivers on Class A shares available at Raymond James

- Shares purchased in an investment advisory program.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC Waivers on Classes A, B and C shares available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's prospectus.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching age 70½ as described in the fund's prospectus.
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.
- Shares acquired through a right of reinstatement.

Front-end load discounts available at Raymond James: breakpoints, and/or rights of accumulation

- Breakpoints as described in this prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the rights of accumulation calculation only if the shareholder notifies his or her financial adviser about such assets.

INTERMEDIARY-DEFINED SALES CHARGE WAIVER POLICIES

ROBERT W. BAIRD & CO. ("BAIRD")

Effective June 15, 2020, shareholders purchasing Fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the SAI.

Front-End Sales Charge Waivers on Class A Shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same Fund
- Share purchase by employees and registers representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchased using the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the Funds' Class C shares will have their shares converted at net asset value to Class A shares of the same Fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Class A and C shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Shares bought due to returns of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable Internal Revenue Service regulations
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulations

- Breakpoints as described in this prospectus
- Rights of accumulations which entitles shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of Fund assets held by accounts within the purchaser's household at Baird. Eligible Fund assets not held at Baird may be included in the rights of accumulations calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases of Funds through Baird, over a 13-month period of time

The information disclosed in the appendix is part of, and incorporated in, the prospectus

FACTS

WHAT DOES MUTUAL FUND SERIES TRUST DO WITH YOUR PERSONAL INFORMATION?

Why?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What?

The types of personal information we collect and share depends on the product or service that you have with us. This information can include:

- Social Security number and wire transfer instructions
- account transactions and transaction history
- investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

How?

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Mutual Fund Series Trust chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information:

Does Mutual Fund Series Trust share information?

Can you limit this sharing?

For our everyday business purposes such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.

PRIVACY NOTICE

Mutual Fund Series Trust Revised July 2017

2 of 2

What we do:

How does Mutual Fund Series Trust protect my personal information?

To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.

Our service providers are held accountable for adhering to strict policies and procedures to prevent any misuse of your nonpublic personal information.

How does Mutual Fund Series Trust collect my personal information?

We collect your personal information, for example, when you:

- open an account or deposit money
- direct us to buy securities or direct us to sell your securities
- seek advice about your investments

We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.

Why can't I limit all sharing?

Federal law gives you the right to limit only:

- sharing for affiliates' everyday business purposes – information about your creditworthiness.
- affiliates from using your information to market to you.
- sharing for non-affiliates to market to you.

State laws and individual companies may give you additional rights to limit sharing.

Definitions

Affiliates

Companies related by common ownership or control. They can be financial and non-financial companies.

- *Mutual Fund Series Trust does not share with affiliates.*

Non-affiliates

Companies not related by common ownership or control. They can be financial and non-financial companies.

- *Mutual Fund Series Trust doesn't share with non-affiliates so they can market to you.*

Joint marketing

A formal agreement between nonaffiliated financial companies that together market financial products or services to you.

- *Mutual Fund Series Trust doesn't jointly market.*
