1. Does not include money market funds. Based on percentage of net assets. Holdings can change at any time and should not be considered investment advice.

2. The numbers shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption of fund shares. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.

3. The table displays the Eventide Global Dividend Opportunities Fund Class N's dividend and capital gains distributions for the periods shown. The distributions will differ for other fund classes, based upon fees and commissions. The total distribution may represent dividend and interest income, capital gains, and/or return of capital. Shareholders should not assume that the source of a distribution from the fund is net profit. As of 6/30/2019, the distributions represented contain no return of capital. The characterization of income is an estimate only and subject to change for tax purposes.

4. NAV presented is as of the date of the respective distribution.

5. SEC Yield is based on a 30-day (or one month) period ending on the date of the most recent balance sheet and is calculated by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. For more information see SEC form N1-A, p. 56.

6. Performance figures for periods greater than 1 year are annualized. Since inception returns assume an inception date of 9/29/2017.

7. The MSCI All Country World Index is a free float adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets and consists of 46 country indexes comprising 23 developed and 23 emerging market country indexes. The volatility of the index may be materially different than that of the fund, and investors should not expect the fund to achieve the same results as the index listed.

The performance and risk factor comparisons are made against the S&P 500 Total Return Index ("Index"). The S&P 500 is an index created by Standard & Poor's of American stocks with the largest market capitalization. Alpha is a measure of performance on a risk-adjusted basis. It takes the volatility (price risk) of a fund and compares its risk-adjusted performance to the Index. Any excess return of the fund relative to the return

of the Index is a fund's alpha. Beta is a measure of the volatility of a fund relative to the Index. A beta greater than 1 is more volatile than the Index. R-Squared measures how a fund's performance correlates with the Index's performance and it can help assess how likely it is that beta is statistically significant. Standard Deviation of return measures the amount of variation in historical performance from period to period.  
 7. Annualized since inception market risk details assume inception date of 10/1/2017 and not Class N's actual inception date of 9/29/2017, as only full month data is included in the market risk calculations.

**Mutual funds involve risk including the possible loss of principal.**

**Past performance does not guarantee future results.** The fund's ethical values screening criteria could cause it to under-perform similar funds that do not have such screening criteria. The fund can have risk related to option investing. There are special risks associated with investments in foreign companies including exposure to currency fluctuations, less efficient trading markets, political instability and differing auditing and legal standards. Companies in the Industrial Sector carry various risks including, but not limited to, risk related to debt loads, intense competition, and sensitivity to economic cycles. Companies in the Utilities sector are subject to interest rate risk and cash flow risk. MLPs carry unique risks including risks surrounding its tax status and risk pertaining to rising interest rates, both of which can negatively impact share price. Yieldcos carry different risks including yieldco sponsor risk and cash flow risk.
